AMPEREX WATER AND AIR COOLED TRANSMITTING TUBES

One of the largest news gathering organizations, operating twenty-six transmitters in various parts of the world, reports highly satisfactory results under the severest conditions of actual service.

In the latter half of 1939, Amperex HF3000's and ZB3200's were installed in several of their transmitters.

After many other types of air-cooled and water-cooled tubes had been tried and found wanting, these Amperex HF3000 and ZB3200 tubes, which had been in continuous operation, were adopted for the entire system.

More than 100 types of Amperex Transmitting and Rectifying Tubes are available for rapid delivery.
