# CARBON COMPOSITION RESISTORS

## TYPE GBT CARBON COMPOSITION RESISTORS

### PERFORMANCE CHARACTERISTICS

These are shown in relation to MIL-R-11 specification limits on the following two pages. A performance span or range is given for each important characteristic. You know in advance the typical limits within which IRC carbon composition resistors can be expected to perform.

The performance data are based on many thousands of individual tests made on random samples taken from production. The resistors are tested to MIL-R-11, and to other tests of greater severity.

### APPEARANCE

IRC carbon composition resistors have a glossy brown, smooth body. The molded jacket has close dimensional tolerances for trouble-free use in high speed lead forming and inserting machines. There is no wax coating to clog equipment.

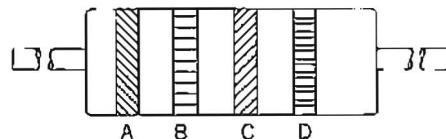

### IDENTIFICATION

Resistance values are clearly indicated by standard EIA/MIL Color Code bands. Solvent-resistant paints are baked on to provide distinct, permanent color bands.

### STANDARD RESISTANCE VALUES

Type GBT resistors are supplied in all EIA/MIL standard values, subject to the minimum and maximum values for each type. (See table.) Other values are available on special order.

### EIA/MIL COLOR CODE

Band A—1st significant figure

Band B—2nd significant figure

Band C—Number of zeros or decimal multiplier

Band D—Tolerance

Color	Significant Figure	Multiplying Value
Black	0	1
Brown	1	10
Red	2	100
Orange	3	1,000
Yellow	4	10,000
Green	5	100,000
Blue	6	1,000,000
Violet	7	10,000,000
Gray	8	100,000,000
White	9	1,000,000,000
Gold	±5% tolerance	0.1
Silver	±10% tolerance	0.01
No col.or	±20% tolerance	

### FIXED COMPOSITION RESISTORS.

IRC's unique design of  $\frac{1}{4}$ -,  $\frac{1}{2}$ - and 1-watt resistors means better performance and reliability. 50% more molding around the resistance element assures greater moisture protection. The working element is a layer of carbon thermally bonded to an inert glass filament for better resistance and temperature characteristics. Ribbed, shoulder leads are deeply imbedded in the molding to prevent twist or pull-out and act as heat sinks to conduct heat away for cooler operation and longer field life.

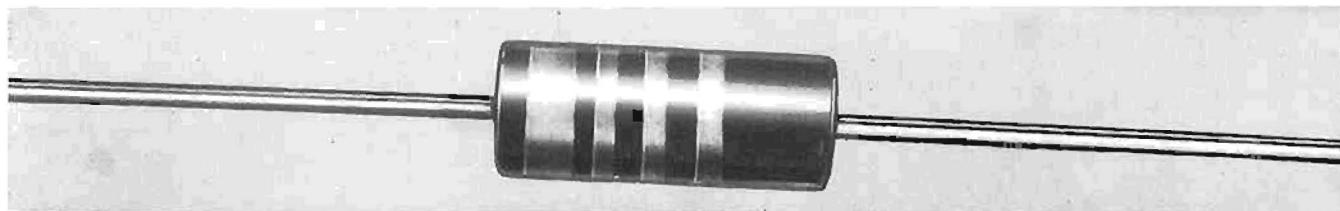

IRC TYPE	GBT $\frac{1}{4}$ - SR $\frac{1}{4}$	GBT $\frac{1}{2}$	GBT 1	SR 2
MIL Style	RC07	RC20	RC32	RC42
MIL Characteristic	GF	GF	GF	GF
Rating	$\frac{1}{4}$ w @ 70° amb.	$\frac{1}{2}$ w @ 70° amb	1w @ 70° amb.	2w @ 70° amb.
Minimum Resistance	10 ohms	2.7 ohms	2.7 ohms	10 ohms
Maximum Resistance	1 meg	22 meg	22 meg	22 meg
Rated Voltage	250V	350V	500V	500V
Dimensions— Body size	$.250'' \times .090''$ dia.	$.390'' \times .140''$ dia.	$.562'' \times .225''$ dia.	$\frac{1}{8}'' \times .312''$ dia.
Lead size	$1\frac{1}{2}'' \times .025''$ dia.	$1\frac{1}{2}'' \times .031''$ dia.	$1\frac{1}{2}'' \times .040''$ dia.	$1\frac{1}{2}'' \times .045''$ dia.

### STANDARD STOCK VALUES

10% and 5% tolerance. 10% in bold type. All values available in 5%. Values are indicated on each resistor by EIA color code.

# MOLDED WIREWOUND RESISTORS

OUTPERFORMS FIXED COMPOSITION RESISTORS

IRC's new BWH molded wire wound resistor can be used in most applications normally filled by the lower values of composition resistors. The BWH exhibits the inherent stability, reliability, and long-term life characteristics of a wire wound unit. It also provides low resistances unattainable in composition resistors.

Exceptionally stable, small and completely insulated the BWH meets or exceeds all MIL-R-11 performance requirements. Because it is the RC-32 size it will fit any 1 watt composition resistor processing equipment.

Resistor processing equipment.  
BWH resistors are packaged on the exclusive IRC GRIP STRIP, and are available in multiples of 10 and 50. The rating of this resistor is:

**1/2 watt at 137°C. ambient**  
**1 watt at 115°C. ambient**  
**2 watts at 70°C. ambient.**

## PERFORMANCE SPECIFICATIONS

Temperature Coefficient: (-55°C to 150°C)

$\pm 0.065\% / ^\circ C$	$\pm 0.030\% / ^\circ C$
0.24 ohm to 1.0 ohm	1.1 ohms to 1500 ohms

In order to cover a wide range of resistance values, it is necessary to use different wire alloys, which have different temperature coefficients of resistance. The above table gives the maximum temperature coefficient within a particular resistance group.

**Inductance.** From  $0.04\mu\text{H}$  ( $0.24$  ohm resistor) to  $5.0\mu\text{H}$  ( $1000$  ohm resistor).

**Dielectric Withstanding Voltage.** 1000 volts rms minimum at atmospheric pressure, 625 volts rms minimum at barometric pressure of 3.4 inches of mercury.

**TOLERANCES & RESISTANCE VALUES.** Available in  $\pm 5\%$  and  $\pm 10\%$  tolerances in accordance with standard EIA resistance values. Minimum standard resistance: 0.24 ohm. Maximum standard resistance: 1500 ohms.

**COLOR CODING.** Resistance values are indicated by standard EIA Color Code bands, and are distinguished from composition resistors by a wide band for the first significant figure.

**INSULATION.** A plastic housing molded with IRC manufactured thermosetting materials at high pressure and temperature results in a high insulation resistance. This protects the element from effects of extreme climatic conditions. Type BWH resistors are brown in color.

### **NOISE, Negligible.**

#### SHELF DRIFT. Negligible

Journal of Clinical Oncology, Vol. 16, No. 10, October 1998 / 337

#### **Low Temperature Operation: -13°C**

**Moisture Resistance:** +6.6% maximum (10 days at 100%)

**Short Time Overload.** (8 watts for 5 seconds)  $\pm 3.0\%$  maxi-

**Load Life.** (After 1000 hrs. at temperature and loading shown on derating curve.)  $\pm 5\%$  maximum group average.  $\pm 10\%$  maximum individual

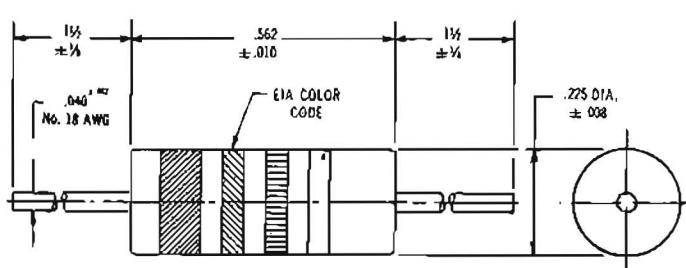

Terminal Strength:  $\pm 1\%$  maximum

Solder  $\pm 1\%$  maximum

Acceleration, Shock, High Frequency Vibration.  $\pm 2\%$  maximum

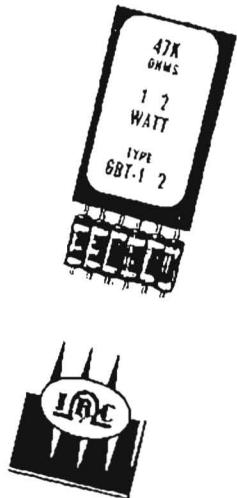

All tests performed as required in MIL-R-11 specification unless noted otherwise.

**NOTE:** Because of test inaccuracies common in measuring low resistance values, an allowance of 0.01 ohm should be added to the resistance change limits listed above.

# RESISTOR KITS & ASSORTMENTS

## HANDY-PAKS

The neatest, most compact resistor package available, and it's exclusive from IRC. Slimline plastic sleeve keeps leads straight and in place.

- Easier to identify—Type, resistance value and power rating on every Handy-Pak. Resistor color code is easily seen through the plastic.
- Handier to use—Opens at either end. Simply slide package out of plastic sleeve . . . withdraw the required number of resistors and slide the package into the sleeve.
- Quicker to find—Handy-Paks can be indexed by power rating and resistance. Resistors are always visible for inventory.

## 3 TYPES AVAILABLE—10% tolerance.

. . . ½ watt contains 6 GBT½ carbon composition resistors; 1 watt package contains 4 GBT1 resistors and the 2 watt Handy-Pak contains 3 SR2 resistors.

## RESIST-O-CADDY

Ideal for in-home servicing. Plastic pouch folds to 6¾" x 3⅝" x 1½" . . . fits easily in tube caddy or tool chest. Individual pockets keep Handy-Paks secure and orderly.

Accurate inventory is always visible. Resist-O-Caddy FREE with either of these two popular assortments:

### ASSORTMENT #41

120 GBT½ ½-watt resistors  
(10% tolerance)  
6 each of 20 values

ohms:	47	150	1,000	2,200	10K	27K	100K	270K	1.0 meg	4.7 meg
	100	470	1,500	4,700	22K	47K	220K	470K	2.2 meg	10 meg

### ASSORTMENT #45

80 GBT1 1-watt resistors  
(10% tolerance)  
4 each of 20 values

## ASSORTMENT NO. 77

### SERVICE CONVENIENCE FROM IRC

This new BWH resistor assortment is a real time and work saver. Resistors are neatly mounted in a sturdy 6" x 12" molded plastic dispenser. They are removed easily, but do not fall out.

- Quick Identification—resistor value is printed on dispenser
- Instant Use—dispenser can be hung over workbench
- Fits easily in tube caddy or tool case
- Keeps leads straight for easier handling

### 38 LOW RANGE RESISTORS

Balanced assortment of miniature wirewounds. Two each of the following values:

.27	.56	1.2	2.7	5.6
.33	.68	1.5	3.3	6.8
.39	.82	1.8	3.9	8.2
.47	1.0	2.2	4.7	

### ONE RESISTOR FILLS THREE REQUIREMENTS

IRC's Type BWII is rated at 2 watts. Body size is the same as a standard 1 watt composition unit . . . small enough for ½ and 1 watt needs. This reduces resistor inventory and provides you with a four-time safety factor. Handles 2 watts at 70°C, 1 watt at 115°C and ½ watt at 137°C. These unique miniature resistors are direct replacements for composition units with the advantages of wirewound stability and low noise.

# RESISTOR KITS & ASSORTMENTS

**RESIST-O-CHEST.** A convenient, sturdy file of Handy-Paks in 6 popular assortments. Metal separators keep Handy-Paks in order at your fingertips. Reference data on inside of lid. Supplied FREE with any of these 5 fast-moving assortments.

## ASSORTMENT #42

204 GBT½ ½-watt resistors  
(10% tolerance)  
6 each of 34 values

ohms:	47	470	2,700	8,200	27K	56K	220K	1.0 meg	4.7 meg

	220	2,200	6,800	22K	47K	150K	470K	3.3 meg	—

## ASSORTMENT #47

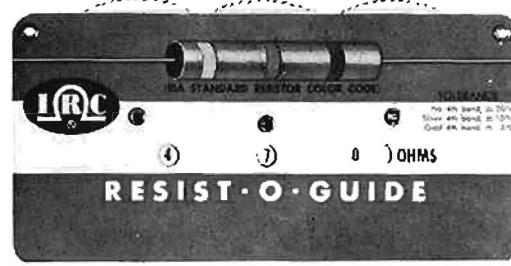

308 GBT1 1-watt resistors  
(10% tolerance)  
4 each of 77 values

**RESIST-O-CABINET.** A practical way to give any shop a professional appearance. Sturdy metal Resist-O-Cabinets are FREE with any of four balanced assortments. Designed for stacking, and for tidy stocks of many small parts. Resist-O-Cabinets have four non-spill drawers and 28 compartments. Overall size is 5¾" x 5⅓" x 10⅜". Blue and silver finish.

**RESIST-O-GUIDES S-008B Resistor Color Code Chart.** New color, serrated edge wheels, up-dated information on IRC types, MIL styles and minimum and maximum values.

# TUBULAR POWER WIREWOUND RESISTORS

**RESISTEG COATED POWER RESISTORS** need no derating. They operate at full rated power even at high resistance values. Other features include heat resistant terminals for easy soldering, ceramic cores that withstand shock and are impervious to moisture, heavy windings that handle overloads without burnout, and standard size spring loaded push-in brackets for easy mounting on sizes of 25 watts and over.

IRC Tubular Power Wirewound Resistors are standard tubular construction with lugs and/or leads for use in general applications. They are used in DC and low frequency AC circuits where appreciable power must be dissipated:

- High voltage bleeder resistors in power supplies
- Voltage dropping resistors
- Voltage divider networks
- Bias supply resistor
- RC decoupling resistor
- Filament dropping resistor
- Load resistor
- Shunt resistor

## FIXED RESISTANCE TYPES

**TYPE 1A**—5-8 watts. Resisteg coating. Core Size: 1" long by  $\frac{3}{4}$ " dia. Terminals: 13A. Tolerance:  $\pm 5\%$ . No mounting hardware included. Standard package: 5.

Ohms	1	20	200	750	2250	8000

# ADJUSTABLE & MILITARY POWER RESISTORS

## ADJUSTABLE RESISTANCE TYPES

IRC Adjustable Power Wirewound Resistors are standard resistors with a track of exposed wire to allow for the adjustable feature. The track or slot is made by masking a section of the winding before coating, and then removing the mask after the coating has cured. No wire brushing, which could damage the resistance wire, is used.

The IRC adjustable feature provides the ideal solution to odd resistance values and to handling a variety of line voltages. One or more adjustable lugs may be used for voltage divided applications.

**TYPE 1 3/4AA**—10-12 watts. Core size: 1 3/4" long x 3/8" dia. Terminals: 12A. One adjustable band; type A. Tolerance:  $\pm 10\%$ . Standard package: 1. Mounting hardware included: Z-0 brackets.

Ohms

# POWER & FUSE RESISTORS

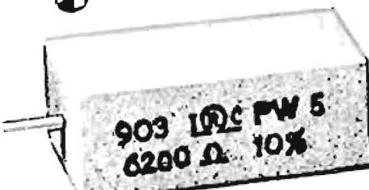

## FUSE RESISTORS

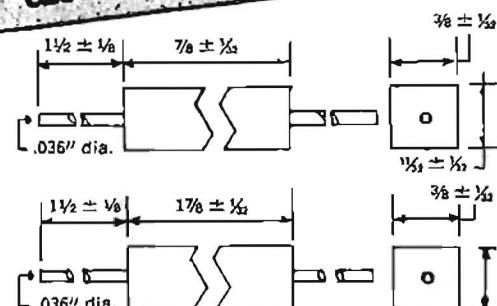

This special resistor functions as a resistor under normal conditions, and as a fuse under overload conditions. It is used extensively as a surge-limiting resistor in voltage doubler circuits of TV receivers. Installation of an IRC Type FR fuse resistor in a TV set will prevent overloading of more valuable components and possible fire due to a short circuit. The compact, modern design of IRC fuse resistor measures only  $1\frac{1}{4}$ " x  $\frac{1}{32}$ " x  $\frac{3}{8}$ ". This unit is completely insulated in a rectangular ceramic case, and equipped with plug-in terminals.

\*suitable for 4.7Ω fuse for resistor applications

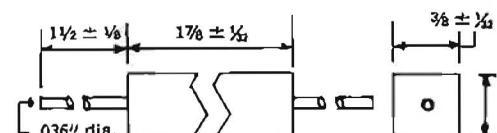

FR5.0\*-5 ohms  
FR5.6—5.6 ohms  
FR7.5—7.5 ohms

These popular axial lead power resistors are the industry favorites for 5 and 10 watt applications. The compact shape fits among other components more easily. The axial lead design speeds installation. And, the superior solderability of the terminals assures sound connections every time. A precisely wound element is sealed in a ceramic case—fully protected and insulated. Conservative rating permits continuous operation at full power. Resistance, wattage

and tolerance are permanently marked on resistor body. Standard tolerance is 10%.

*Popular Assortments* of PW5 and PW10 resistors are available for handy bench stocks. Values are selected on the basis of usage. Resistors are mounted on plastic covered cards with hole for hanging.

Assortment #PW5x10      10 best selling PW5 resistors  
Assortment #PW5x20      20 best selling PW5 resistors  
Assortment 20A      20 best selling PW10 resistors

## MULTI-RANGE POWER RESISTORS

Up to 47 values from a single resistor. 5 multi-range resistors give complete 10 watt coverage . . . 200 values from  $\frac{1}{2}$  to 50,000 ohms. No delays for a particular value, and you don't tie up inventory with odd values. Ideal for in-home servicing and weekend shop work.

Four-wire wound elements are sealed in a steatite housing. It's simple to solder a basic interconnection for the required value, and cut off unused terminals. Connection diagrams included.

### 5 TYPES COVER 200 VALUES

TYPE MR1. 0.5 through 15 ohms. 1, 2, 4, 8 ohm elements. 10 watts. 47 values.  
TYPE MR2. 5 through 150 ohms. 10, 20, 40, 80 ohm elements. 10 watts. 47 values.

TYPE MR3. 50 through 1,500 ohms. 100, 200, 400, 800 ohm elements. 10 watts. 47 values.

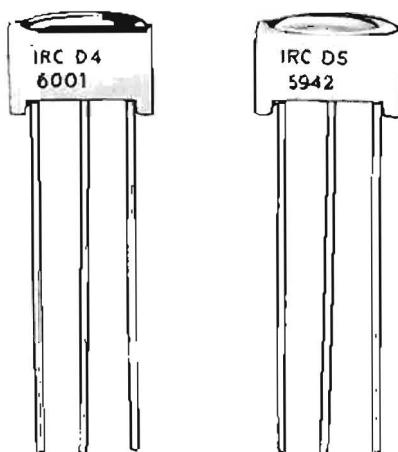

TYPE MR4. 500 through 15K ohms. 1K, 2K, 4K, 8K ohm elements. 10 watts. 47 values.

TYPE MR5. 3K through 50K ohms. 10K, 10K, 15K, 15K ohm elements. 10 watts. 12 values.

### MULTI-RANGE KIT #55

Complete 10 watt power resistor coverage that fits in the palm of your hand. Rigid clear plastic case holds 5 Handy-Paks, 2 of each type MR resistor. With these 10 versatile resistors you have finger-tip coverage of 200 values from  $\frac{1}{2}$  to 50,000 ohms. Fits easily in tool case or tube caddy.

# DUAL DIODES

**DIODES.** Universal selenium dual diodes for horizontal phase detectors and remote control in TV receivers. Also used in radio control devices for model planes, and other circuits. Available in four basic types.

The small size, economy, ease of installation and reliable construction of the IRC dual selenium diodes make them ideal for many low-voltage, low-frequency applications. To suit them to various circuits, these dual diodes have either common-anode, common-cathode, or series form of internal connection. The cells in each unit are matched to assure electrical balance.

Alloy-plated leads facilitate soldering. No clamp or other mounting device is needed, since the three leads readily support this flyweight unit.

## Designed for Long Life

Construction features include an integral heatsink and a "floating" spring that gives proper pre-load over the full operating temperature range. No paper, laminates or other material that might absorb moisture are used. Moisture-excluding materials cushion the active elements and isolate them from encapsulant.

## Electrically Balanced and Noise Free

IRC processes each selenium cell to give it a smooth, uncontaminated surface and periphery with no fractures. This technique insures uniform current density over the entire cell area and prevents noisy, unreliable operation.

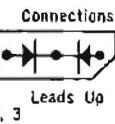

To indicate polarity, one corner of the case has a diagonal cutoff. This assures correct orientation of units in automated assembly, and allows use of both sight and touch to get proper polarity at manual assembly and inspection.

# PRECISION WIREWOUND RESISTORS

## WIREWOUND PRECISION RESISTORS.

For accuracy in critical applications, IRC Precision Wire Wound resistors are produced to exacting standards of reliability. IRC's winding technique prevents shorted turns or strains in the winding, and special insulation gives excellent protection from humidity. Positive electrical connections and easy soldering.

# PRECISION DEPOSITED CARBON RESISTORS

**DEPOSITED CARBON PRECISIONS** are available in  $\frac{1}{2}$ , 1 and 2 watt sizes. The wide range of values, 1% tolerance, economy, low voltage coefficient, excellent frequency characteristics, predictable temperature, high voltage rating, low noise level, and small size make IRC deposited carbon resistors ideal for application in advanced electronic equipment and critical TV circuits.

**MOLDED DEPOSITED CARBON RESISTORS** are designed for high reliability, stable performance, low voltage coefficient, low capacitive and inductive impedance in high frequency applications. In miniature  $\frac{1}{8}$ ,  $\frac{1}{4}$ , and  $\frac{1}{2}$  watt sizes, plus 1 and 2 watt types.

Standard tolerance is 1%. (2% tolerance on high range units.) The housing gives complete protection, and offers better heat dissipating qualities. This results in improved load life and maximum moisture protection.

## MIL VALUES—TYPES DCC, DCF, DCH and MDC

One decade of standard values is as follows:

# SNAPTROL

**PROVIDES VERSATILITY  
AND EASE OF ASSEMBLY**

**SNAPTROL.** Newest of three IRC replacement systems designed to provide servicing technicians with satisfactory replacements for comprehensive coverage of single controls, tandem dual controls, matched stereo controls and concentric dual controls for television, radio, auto sets and high fidelity equipment.

SNAPTROL provides a broad variety of basic, factory assembled control sections, shafts and switches which snap together to provide a wide selection of replacement controls. Literally, it is a "snap" to assemble nearly any standard or special control.

**SERIES 45 INDUSTRIAL CONTROLS.** With a variety of five basic control components, the Series 45 line permits quick assembly of 12,631,500 different control specifications. These include single, double, triple and quadruple section controls, with or without power switches, in all popular styles and ranges needed for industrial electronic equipment.

Series 45 components are completely compatible and interchangeable with SNAPTROL. Together, these two snap-together systems provide an almost unlimited means to furnish unusual and special controls for industrial applications.

**EASY TO USE.** Parts assemble into exact duplicate control in 15 to 30 seconds. Sections completely factory assembled. No shaft cutting or modification needed.

**GREATER VERSATILITY.** SNAPTROL provides new and unique designs which provide for better utility and adaptability of component parts:

**1—Interchangeable Control Mountings.**  $\frac{3}{8}$ ",  $\frac{1}{10}$ " and  $\frac{1}{2}$ " diameter bushings of varying lengths and bores, quickly thread into front control sections. Accommodates thick panel requirements without extra bushing or adjuster. Specially designed tab mounting plates or printed circuit brackets easily attached in place of bushings. This exclusive new design feature reduces the number of front sections needed and extends their use in a greater variety of replacement needs.

**2—Printed Circuit Terminals.** All carbon control sections are equipped with terminals that will handle both conventional and printed circuit wiring. This original CTS-IRC terminal design doubles the adaptability of control sections.

**3—Rotary or Pull-Push Power Switches.** Either type of power switch snaps onto either carbon Front or Rear Sections. Another exclusive CTS-IRC design feature which very considerably increases the utility of control components.

**4—Uniform Diameter Rear Section Shafts.** New design of rear section (inner) shafts provide uniform diameter — permits use of heavy-walled front section (outer) shaft contributing better concentric shaft operation and superior knob retention. Simple compression type adapter fits rear section shaft to knobs normally requiring larger diameter. No drilling or modification of knobs needed. Shafts are flattened or slotted as required -- no shaft insert or tine needed! This new design reduces the number of exact length shafts required for broad replacement coverage.

**5—Front Sections Serve for Single Controls.** Without modification or adapters, all SNAPTROL front sections may be used for single control replacements. Provides practical use of single front section for special bushings, tab mountings, printed circuits, special shaft needs and a variety of power switches. No other section-type control system provides such broad versatility.

**FEWER COMPONENT PARTS.** Because of the realistic design features provided, SNAPTROL requires far fewer items of components than any other section-type exact duplicate control system which offers so broad a replacement coverage. (Over 1700 exact duplicate concentric dual controls and many thousands of single controls.)

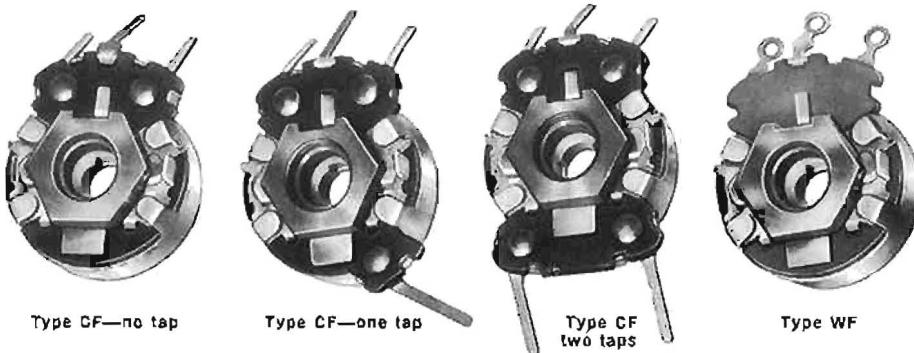

**BEST SELLING CONTROLS.** SNAPTROL is a special replacement design of the world's most frequently specified and most widely sold CTS Series 45 control. Over 300,000,000 in current use — a strong testimony to the quality and performance of these outstanding controls.

# SNAPTROL

## SNAPTROL CARBON AND WIREWOUND FRONT SECTIONS

Type CF Carbon Front Sections and Type WF Wirebound Front Sections are factory-assembled controls supplied without control mounting, shaft or dust cover. Bushing, tab mounting plate or printed circuit bracket thread into front section as required. Carbon or wire-wound rear sections snap onto either style front section for concentric or tandem dual controls. A variety of single or concentric outer shafts snap into front sections. Either rotary or pull-push switches will snap onto CF Front Sections. WF Front Sections will not operate switches. Printed Circuit Terminals are employed

on CF sections while standard hole-type terminals are supplied on WF sections. Diameter of either front section is  $1\frac{3}{16}$ ". Wattage rating: CF Sections —  $\frac{1}{2}$  watt, WF Sections — 5 watts (linear tapered sections).

# SNAPTROL

## CONTROL MOUNTINGS FOR FRONT SECTIONS

A variety of control mountings permit the use of SNAPTRON Front Sections for many different replacement controls. Bushings of varying diameters and inside bores thread into front sections. Tab mounting plates and printed circuit brackets attach to front section with special male nut supplied with each.

This exclusive design feature of selectable control mountings actually reduces inventory investment for distributors and servicing technicians. For a specific resistance value and taper, only one SNAPTRON Front Section is needed—in contrast to other systems where an additional front section is needed for each different control mounting.

Stock No.	Description
BU1	Bushing $\frac{3}{8}$ "—32 x $\frac{1}{4}$ " FMS—for single controls
BU2	Bushing $\frac{3}{8}$ "—32 x $\frac{3}{8}$ " FMS—for single controls
BU3	Bushing $\frac{3}{8}$ "—32 x $\frac{1}{2}$ " FMS—for single controls

BU7	Tab mounting with nut—for concentric controls
BU8	Bushing $\frac{3}{8}$ "—28 x $\frac{1}{8}$ " FMS—for concentric controls

Stock No.	Description
BU9	Bushing $\frac{1}{16}$ "—28 x $2\frac{1}{4}$ " FMS—for concentric controls. Double flat.
BU10	Bushing $\frac{1}{2}$ "—28 x $2\frac{1}{4}$ " FMS—for concentric controls. Single flat.
BU11	Tab mounting with nut—for single controls
BU12	Printed circuit bracket with nut—for single controls
BU13	Printed circuit bracket with nut—for concentric controls
BU14	Bushing $\frac{3}{8}$ "—32 x $1\frac{1}{2}$ " FMS—for single controls
BU15	Bushing $\frac{3}{8}$ "—32 x 2" FMS—for concentric dual controls.

## CARBON & WIREWOUND REAR SECTIONS

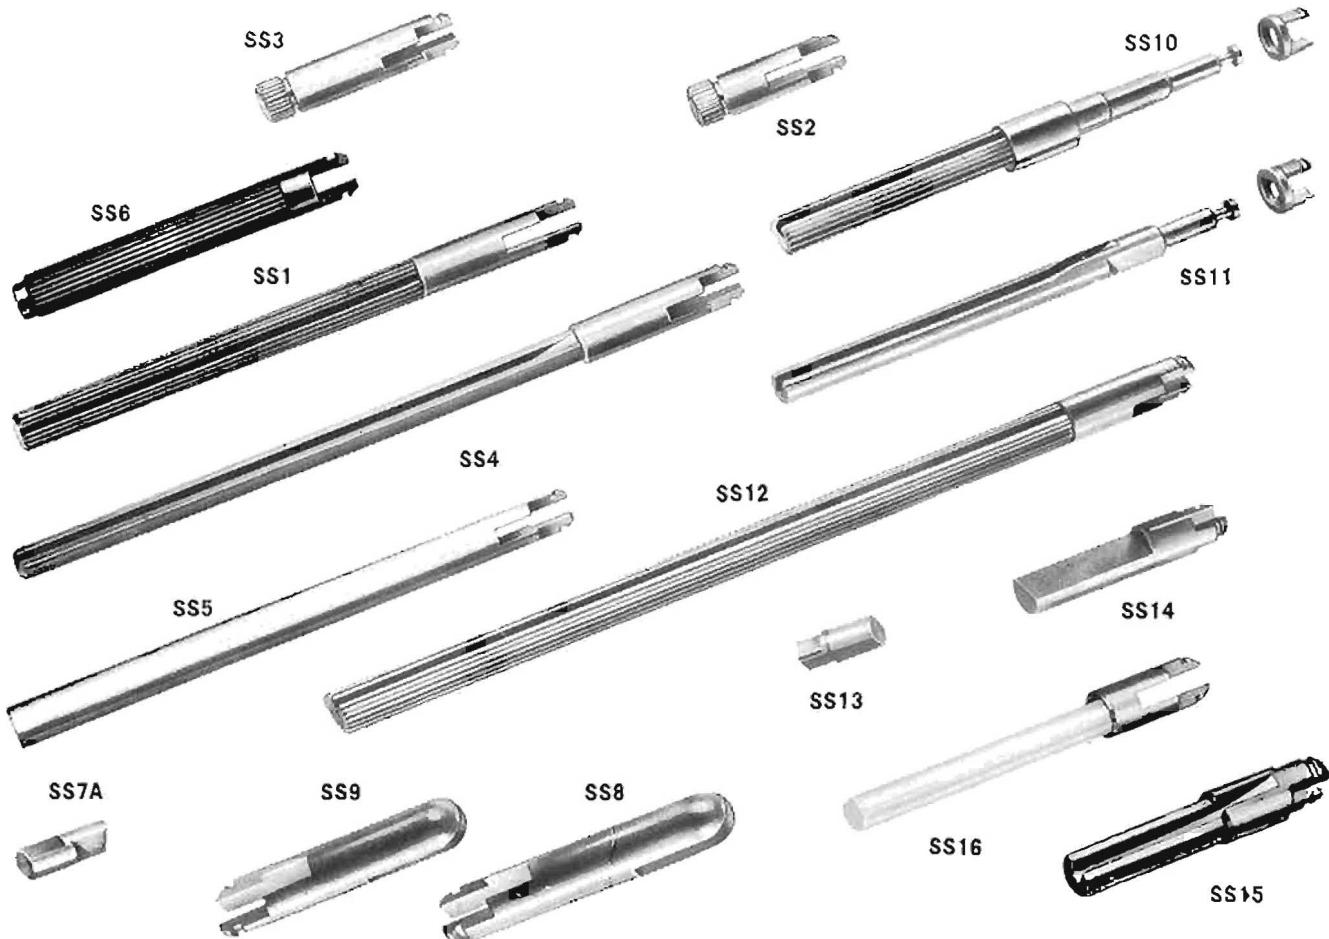

Type CR Carbon Rear Sections and Type WR Wirewound Rear Sections snap onto SNAPTRON Front Sections for use as either concentric dual or tandem dual controls. Rotary or pull-push power switches snap onto CR sections. WR sections do not accept switches. Rear or inner concentric shafts snap into either type of rear sections for concentric dual operation. SS7A Intersection Insert provides tandem dual operation. Additional tandem sections may be snapped on by use of SS13 Multisection Couplers.

### SINGLE CONTROL SHAFTS

Universal single control shafts for SNAPTROL permit front sections to be used as universal single control replacements.

STOCK NO.	DESCRIPTION
SS1	KNOBMASTER Shaft. Knurled, grooved and slotted for universal use. 3" long F.M.S.
SS2	Short, screw-driver slotted shaft. $\frac{1}{2}$ " long, F.M.S.
SS3	Short knurled and screw-driver slotted shaft. $\frac{3}{4}$ " long, F.M.S.
SS4	$\frac{5}{16}$ " diameter shaft. Flatted and grooved. 4" long F.M.S.
SS5	Full round $\frac{1}{4}$ " diameter shaft. 3" long F.M.S.
SS6	Insulated Shaft. $\frac{1}{4}$ " diameter x $1\frac{3}{8}$ " long. Screw-driver slot and knurled full length.
SS7A	Intersection insert. Converts concentric rear section to tandem rear section with single shaft.
SS8	Special rounded end and slotted shaft for G.E. controls—.79" long F.M.S.

STOCK NO.	DESCRIPTION
SS9	Special rounded end and slotted shaft for G.E. controls—.60" long F.M.S.
SS10	For K switch (push-pull) operation with single Front Section. 3" Knobmaster Shaft (same as SS1) with insert.
SS11	For K switch (pull-push) operation with single Front Section. 2" long flatted and grooved $\frac{5}{16}$ " diameter shaft (similar to SS4) with insert.
SS12	Long Knobmaster Shaft. Same as SS1 but 5" long.
SS13	Multisection Insert. For use between second and third or successive tandem sections. (Note SS7A used between first and second sections.)
SS14	Short flatted shaft. $\frac{1}{4}$ " diameter by $\frac{3}{4}$ " long F.M.S., flatted full length. Provided for short, flatted tab mounted controls.
SS15	$\frac{5}{16}$ " diameter shaft, flatted and grooved full length. $\frac{3}{4}$ " long F.M.S.
SS16	Insulated shaft, $\frac{5}{16}$ " diameter flatted full length. $1\frac{1}{2}$ " long F.M.S.

## POWER SWITCHES

SNAPTROL rotary and pull-push power switches snap on to carbon front or rear sections.

Stock No.	Description
GC	Rotary Power Switch, S.P.S.T.
K	Pull-push Power Switch, S.P.S.T.
VF	Rotary Power Switch, S.P.D.T.
WF	Rotary Power Switch, D.P.S.T.

## DUST COVER

Stock No.	Description
DC1	Dust Cover For use on either front or rear section when switch is not used.
DC2	Reverse Tab mount dust cover.

Type DC1

Type DC2

Type GC

Type K

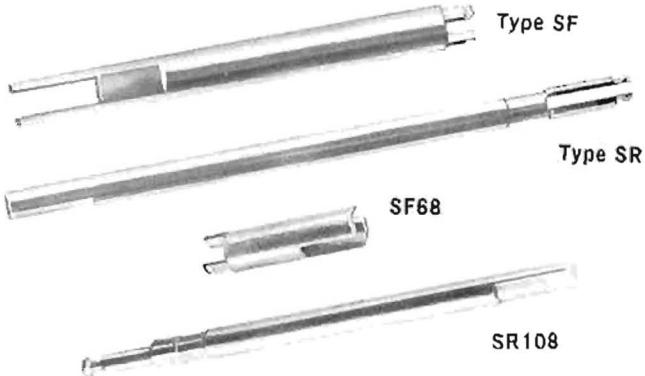

Types VF/WF

## EXACT DUPLICATE SHAFTS

SNAPTROL Exact Duplicate Shafts are supplied to close tolerances against original control specifications. Easily snap into molded nylon rotors of front or rear sections. Uniform diameter of rear section (inner) shafts permit use of heavier wall on front section (outer) shafts providing better concentric rotation and superior knob fit. Knob Adapter (Stock No. KA1) fits rear (inner) shaft to knobs normally requiring larger diameter shafts. No drilling or modification of knobs is required. No cutting of shafts is needed with SNAP-TROL Exact Duplicate Shafts! Easy to install!

**Knob Adapter.** Fits rear section shaft to knob requirements of over-size shaft. Converts .187" diameter shaft to .202" diameter shaft.

# SNAPTROL DEALER STOCKS

## SPACIOUS STOCK CABINET

The same handsome stock cabinet is provided with either No. 87 or No. 89 stocks. Permits ready conversion of Basic Stock to Expanded Stock. Sturdy two-shelf metal cabinet measures 17 $\frac{1}{8}$ " wide, 11 $\frac{1}{16}$ " deep and 9" high. Provides twelve large "see-thru" plastic drawers with new locking divider feature. Drawers measure 11" deep, 4" wide and 2" high—956 cubic inches of stock space! All needed dividers are included. Both drawer front and bottom labels provide full location and identification data.

## WIDE COVERAGE OF CONTROL TYPES

SNAPTROL Dealer Control Stocks provide unusually wide variety of single, tandem and concentric dual control types. Included are nearly endless combinations of control mountings, shafts and power switches with both carbon ( $\frac{1}{2}$  watt) and wirewound (5 watts) front and rear sections. Control mountings include  $\frac{3}{8}$ ",  $\frac{7}{16}$ " and  $\frac{1}{2}$ " diameter bushings, tab mountings and printed circuit brackets. Shaft styles encompass  $\frac{1}{4}$ " and  $\frac{3}{16}$ " universal types, screw-driver slotted and insulated styles, rear adjustment feature, and a broad selection of exact duplicate shafts which require no cutting or modification.

Rotary and pull-push power switches attach to either single or concentric control styles. Concentric dual controls include carbon front end and rear sections, wirewound front and rear sections and wirewound front sections with carbon rear sections. Carbon units are equipped with printed circuit terminals for universal use. Broad selection of resistance values and tapers. Replacement data, pricing information and full instructions included.

## SNAPTROL DEALER CONTROL STOCKS

Geared to the real replacement control needs of servicing technicians, these new SNAPTROL stocks combine fast, snap-together assembly with unique, inventory-saving versatility. Carefully studied selections of SNAP-TROL components assure broadest needed replacement coverage per dollar invested. Special attention has been given to actual component combinations needed for exact duplicate TV and Auto Set concentric dual controls.

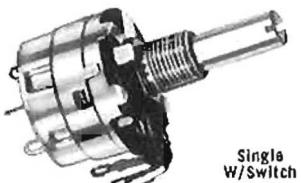

Two carefully planned stocks are available. No. 87 is a Basic Stock. No. 89 is an Expanded Stock with nearly three times the replacement coverage. Both stocks are housed in a large metal cabinet with twelve "see-thru" drawers. Full identification of parts with unique labelling system. Basic stock may be changed to the expanded stock with No. 88 Conversion Stock.

# SNAPTROL/SERIES 45 INDUSTRIAL CONTROLS

Single  
W/Switch

## IRC-CTS SERIES 45 CONTROLS

Designed to provide a wide variety of  $\frac{1}{2}$  watt controls for industrial applications, the Series 45 is a snap-together system in which selected values and sizes of five basic components will quickly assemble any of 12,631,500 specifications. Included are 25 values and tapers of single control or panel sections, 20 popular values of multi-sections or rear control sections, 20 most used shafts in length increments of  $\frac{1}{16}$ " from  $\frac{1}{2}"$  to 2" plus a 3" length, 2 rotary power switches and a control dust cover. Completely compatible and interchangeable with SNAPTROL, the Series 45 affords an extremely broad selection of mechanical and electrical specifications for industrial applications.

## SERIES 45 SNAP-IN SHAFTS

20 most often needed shafts for industrial applications. Provide screwdriver slot, flat, knurl or full round types in  $\frac{1}{16}$ " increments from  $\frac{1}{2}"$  to 2" in length. 3" length included. Broad shaft selection generally eliminates need for cutting or modification. All shafts  $\frac{1}{4}$ " diameter.

## POWER SWITCHES AND DUST COVER

Snap on to either panel or rear sections. Dust cover used where switch is not required.

Type D/S

Type 45C

STOCK NO.	DESCRIPTION
D	DPST Power Switch (Snaptrol WF)
S	SPST Power Switch (Snaptrol GC)
45C	Dust Cover (Snaptrol DC1)

**SINGLE CONTROL OR FRONT SECTIONS.** 25 most used resistance values in two resistance tapers: 45A logarithmic taper and 45D linear taper. Rated at  $\frac{1}{2}$  watt (linear taper). Equipped with  $\frac{3}{8}$ — $32 \times \frac{3}{8}$ " long bushing for  $\frac{1}{4}$ " diameter shafts. Mounting nut included. Resistance tolerance  $\pm 20\%$ .

IDENTIFY ANY OF 12,631,500 SERIES 45 CONTROLS WITH THIS SPECIFICATION NUMBER SELECTION CHART

Suppose triple controls are wanted with these specifications, 500K log taper panel section, 10-meg linear taper second section, 10K ohms linear taper third section, plus SPST switch and a  $1\frac{1}{2}$ " split-knurled shaft. The specification number would be 45A504D106D103S20, derived from this chart as follows: 45 for Series 45, A504 for the panel section, D106 for the second and D103 for the third sections, S for SPST switch (symbol omitted if no switch wanted) and 20 for the desired shaft. Omit codes of unwanted features. Ex: 45D50116 for single control. This is a linear taper 500 ohm control with #16 shaft (2" full round), no switch.

**ENGINEERING LAB STOCKS.** Series 45,  $\frac{1}{2}$  watt controls to meet more than 12 million requirements. Two IRC engineering lab stocks include snap-together sections, control shafts, switches and dust covers. Ideal for building breadboards and prototypes. Grey metal cabinets stack or hang. Clear plastic drawers are labeled and separated for easy inventory and stock control.

### SWITCHES AND COVERS

Quantity	Item	Description
3	DPST	Rotary type, 3 amps at 125 volts, 1 amp at 250 volts, 5 amps at 20 volts, AC. UL approved.
9	SPST	Rotary type, 3 amps at 125 volts, 1 amp at 250 volts, AC. UL approved.
42	45C	Snap-on Cover.

# CONCENTRIKIT TYPE Q

## IRC-CTS TYPE Q CONTROLS AND BASE ELEMENTS

Type Q Replacement Controls and the versatile Type Q Base-Element provide the broadest selection of resistance values and tapers. Type Q is equipped with 3" long Knobmaster Shaft—flatted, grooved and knurled for universal knob fit. Bushing  $\frac{3}{8}$ —32 by  $\frac{1}{4}$ " long FMS. Stock numbers in parentheses ( ) may be assembled with Base-Element indicated and SK1 Kit. PPQ items may be assembled with Base-Element listed and either SK7 or SK8 as required.

Type Q

\* Taper listing shows both new (numerical) Taper and old (alphabetical) Taper. See Taper explanation chart, page 28.  
 \*\* Stock numbers listed in parentheses () are not available as factory-assembled controls. Use Q Base-Element shown with SK1 Kit for field assembly of such items.

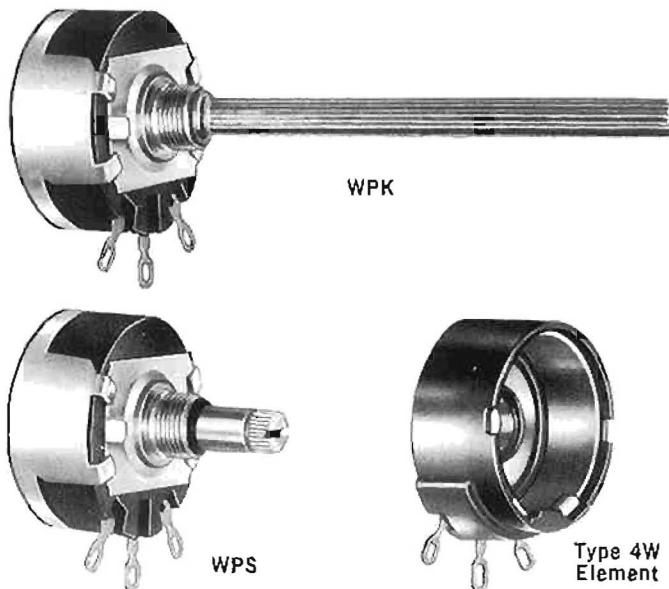

# TYPE 4W CONTROLS AND BASE ELEMENTS

Types WPK and WPS are compact,  $1\frac{1}{4}$ " diameter wire wound controls available for replacement use in two popular shaft styles and an extensive variety of resistance values and tapers. Many stock numbers can be supplied as factory-assembled units. All stock numbers may be assembled in field using Base-Element with SK4 or SK5 Kit as desired.

Resistance elements are uniformly wound with highest grade alloy resistance wire on special form that withstands high temperature without shrinking. Pressure molded plastic housing is designed for maximum heat dissipation and accurate location of terminals. Contactor and collector are of long-wearing alloy that makes direct contact.

Resistance tolerance is  $\pm 10\%$

\* Stock numbers listed in parentheses () are not available as factory-assembled controls. Use 4W Base-Element shown with SK4 Kit (for WPK) or SK5 Kit (for WPS). See Taper explanation chart, page 28.

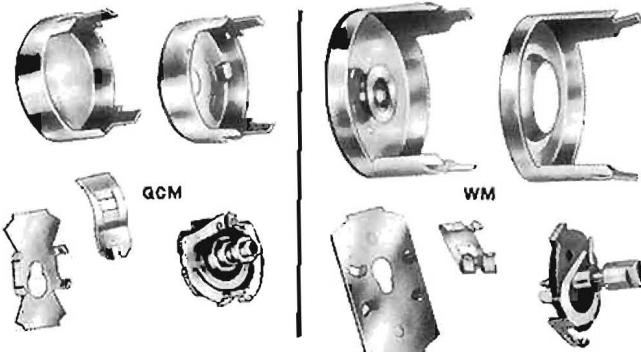

# CONCENTRIKIT TYPE Q & 4W PARTS

## SHAFT KITS FOR TAB-MOUNTED CONTROLS

Similar to SK Kits, the TM series provide tab-mounting plate instead of bushing. Metal-cased 76-1, 76-2 and 76-4 may be used with this series. Kits include shaft, tab-mount plate and cover.

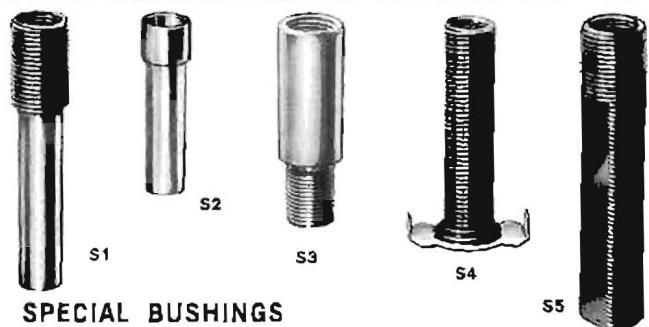

Stock No.	Description
TM1	1/4" diameter shaft, 1/4" long FMS. Screwdriver slot and short knurl.
TM2	1/4" diameter shaft, 5/8" long FMS. Screwdriver slot and short knurl.
TM3	1/4" diameter shaft, 1" long FMS. Screwdriver slot and short knurl.
TM4	1/4" diameter insulated shaft, 1 1/2" long FMS. Slotted and knurled full length. Not used with switches.
TM5	Knobmaster shaft, 2" long FMS. Knurled, grooved and flatted.
TM6	Special rounded and slotted shaft for G.E. 1 1/2" long FMS.
TM7	Special rounded and slotted shaft for G.E. 1 1/2" long FMS.
TM8	1/8" diameter shaft 2" long FMS. Flatted and grooved.
TM9	Reverse tab mount kit nylon shaft, 1 1/2" FMS. 1/4" dia., slotted and knurled.
TM10	Tab mount kit nylon shaft, 1 1/2" FMS. 1/4" dia., flatted full length.

## MULTISECTION KITS

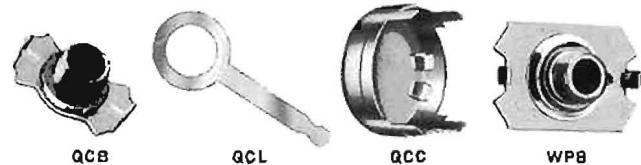

These kits provide parts needed to assemble desired Base-Element into a Multisection or rear control section. Permits assembly of dual, triple or quadruple section controls. Each kit contains internal shaft contactor assembly, front and rear covers, coupling plate and section coupler. Close-coupled construction provides minimum depth behind panel.

Stock No.	Description
QCM	Multisection Kit for Type Q. Specially designed for critical requirements of stereo controls. Will operate rotary power switches.
WM	Multisection Kit for Type 4W. Will not operate power switches.

## SPECIAL BUSHINGS

Stock No.	Description
S1	Sleeve Bushing—attaches to 3/8—32 Bushing.
S2	Bearing Bushing—attaches to 3/8—32 Bushing.
S3	Spacer Bushing—attaches to 3/8—32 Bushing.
S4	Sets control 1" behind panel.
S5	Universal 1/4" diameter Bushing—Type Q only. 1 1/2" FMS.
	Universal 1/4" diameter Bushing—attaches to 3/8—32 Bushing. 2 1/2" FMS.

## Q/W CONTROL PARTS

These parts facilitate assembly of many varied controls using desired shafts and base elements.

Stock No.	Description
QCB	Type Q Bushing. 3/8"—32 thread. 1/4" long FMS. For single controls.
QCB-1	Type Q Bushing. 3/8"—32 thread. 3/8" long FMS. For single controls.
QC5-2	Type Q Bushing. 3/8"—32 thread. 1/2" long FMS. For single controls.
QCB-3	Type Q Locking Bushing. 3/8"—32 thread. 3/8" FMS.
QCB-4	Type Q Bushing. 3/8"—32 thread. 1 1/2" FMS. For single controls.
QCB-5A	Type Q Bushing. 3/8"—32 thread. 2" FMS. For concentric dual controls.
QCB-6	Universal 1/4" Diameter Bushing. 1" FMS, attaches to 3/8"—32 Bushings. Can be used as L and T Pad Bushing extender.
QCC	Type Q Cover. For plain or tapped controls.
QCL	Grounding Lug for 3/8"—32 Bushing. Lug length 1 1/2" from hole center.
QCN	Mounting Nut for 3/8"—32 thread.
QCP	Printed circuit bracket w/nut.
WPB	Type 4W Bushing. 3/8"—32 thread. 1/4" long FMS.
WPC	Type 4W Cover.

## EXTENSION SHAFTS & COUPLERS

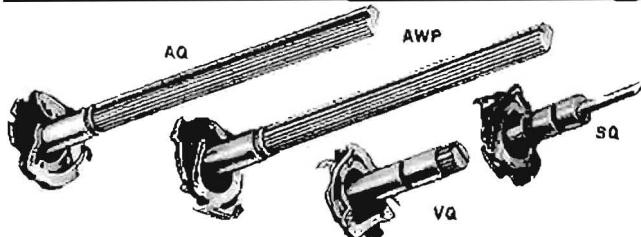

Stock No.	Description
441	Extension Shaft—4" x 1/4" with 1/2" flat.
442	Extension Shaft—4" x 1/4" with 3/2" flat.
443	Extension Shaft—4" x 3/4" with 1/2" flat.
444	Extension Shaft—8"x1/4" with 1/2" flat for 4".
C3	Shaft Coupler—coupling 1/4" shafts; insert allows coupling of 1/4" shaft to 1/2" shaft.

# CONCENTRIKIT TYPE Q & 4W PARTS

## HARDWARE FOR CONCENTRIKIT

Stock No.	Description
KA1	Knob Adapter. Fits rear section shaft to knob requirements of over-size shaft. Converts .187" diameter shaft to .202" diameter.
N1	Mounting Nut for $\frac{1}{8}$ " Bushings ( $\frac{5}{8}$ " across flats).
N2	Mounting Nut for $\frac{1}{2}$ " Bushings ( $\frac{5}{8}$ " across flats).
N3	Mounting Nut for $\frac{1}{2}$ " Bushings ( $\frac{5}{8}$ " across flats).
N4	Mounting Nut for $\frac{1}{8}$ " Bushings ( $\frac{1}{2}$ " across flats).
R2	Concentrikit.
R3	Q Concentric Duals.
R4	WP Concentric Duals.
R5	Ground Plate Tab Concentric Dual.
R6	Retainers as supplied in K16, K17 and K18 Kits.
R7	Shaft retainer for $\frac{1}{4}$ " diameter shafts. Replaces R1.

## SINGLE CONTROL SHAFTS

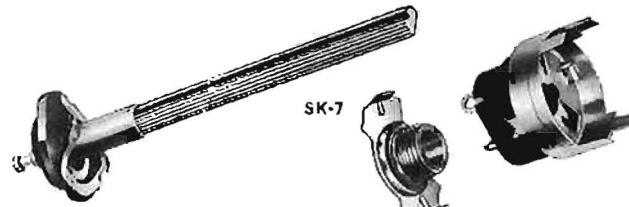

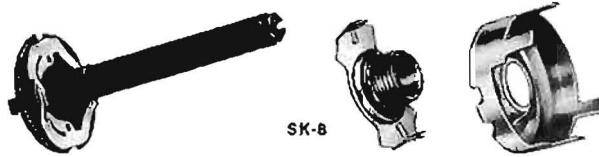

Using control parts listed on page 6, these shafts will assemble many variations of Types Q and 4W controls. Individually boxed with R7 retainer (except TQ).

Stock No.	Description
AQ	Knobmaster shaft, $\frac{1}{4}$ " diameter, 3" long FMS. Flatted, grooved and knurled full length. Fits knobs requiring flatted or knurled shaft. Uses QCB Bushing. For Type Q.
AQ-5	Same as AQ but 5" long FMS. For Type Q. (Bushing included.)
AWP	Same as AQ but for Type WPK control.
AWP-5	Same as AWP but 5" long FMS.
JQ	$\frac{1}{8}$ " diameter shaft, $\frac{1}{2}$ " long FMS. Flatted .105" full length. Uses QCB Bushing. For Type Q.
NQ	$\frac{1}{8}$ " diameter shaft, 4" long FMS. Flatted and grooved full length. Uses QCB Bushing. For Type Q.
PQ	$\frac{1}{4}$ " diameter shaft, 3" long FMS. Full round. May be used with $\frac{1}{4}$ " or $\frac{3}{8}$ " long bushings. ( $\frac{3}{8}$ " long bushing included.) For Type Q.
PWP	Same as PQ but for Type WP control.
RQ	$\frac{1}{4}$ " diameter shaft, $\frac{1}{2}$ " long FMS. Screwdriver slotted. Used with $\frac{3}{8}$ " long bushing only (included). For Type RQ.
SQ	$\frac{1}{4}$ " diameter shaft, $\frac{1}{2}$ " long FMS. Screwdriver slotted with short knurl. Uses QCB Bushing. For Type Q.
SWP	Same as SQ but for Type WPS. Uses WPB Bushing.
TQ	$\frac{1}{4}$ " diameter shaft, 3" long FMS. Insulated, full round. Cannot be used with switch. Uses QCB, QCB-1, QCB-2. For Type Q.
VQ	$\frac{1}{4}$ " diameter shaft, $\frac{1}{2}$ " long FMS. Tongued end $\frac{1}{8}$ " wide by $\frac{1}{8}$ " long by .050" thick. Uses QCB Bushing. For Type Q.
WQ	$\frac{1}{4}$ " diameter shaft, 1" long FMS. Tongued end $\frac{1}{8}$ " wide by $\frac{1}{2}$ " long by .062" thick. Uses QCB Bushing. For Type Q.

## POWER SWITCHES

Easily attached to Type Q or Type 4W controls. Stock No. 76-5 supplied for replacement only. For attachment of this pull-push switch to controls, use SK7 or SK8 Kit below with desired Base-Element.

Stock No.	Description
76-1	S.P.S.T.—Rotary type for Type Q.
76-2	D.P.S.T.—Rotary type for Type Q
76-4	S.P.O.T.—Rotary type for Type Q. Used also as "make-one, break-one" for spot-killer switch in TV.
76-5	S.P.S.T.—Pull-push type for Type Q.
76-11	S.P.S.T.—Rotary type for Types WP, WPK, WPRL, WPS.
76-12	D.P.S.T.—Rotary type for Types WP, WPK, WPRL, WPS.

## SHAFT KITS FOR BUSHING MOUNTED CONTROLS

Package of parts for assembly of specific standard or special control type. Includes shaft, bushing and cover. Add desired Base-Element.

Stock No.	Description
SK1	Assembles Q Control with Knobmaster Shaft.
SK2	Assembles Q Control with RQ Shaft.
SK3	Assembles Q Control with SQ Shaft.
SK4	Assembles WPK Control.
SK5	Assembles WPS Control.
SK6	Assembles Q Control with Insulated Shaft.
SK7	Assembles Q Control with Knobmaster Shaft and 76-5 Pull-push Switch (Switch included). Shaft is 3" FMS.
SK8	Assembles Q Control with $\frac{1}{8}$ " diameter universal shaft and 76-5 Pull-push Switch (Switch included). Shaft is 3 $\frac{1}{2}$ " FMS.
SK9	Assembles Q Control with $\frac{1}{8}$ " diameter universal shaft. 3 $\frac{1}{2}$ " FMS.

# CONCENTRIKIT FOR CONCENTRIC DUALS

K-2

K-16

## CONCENTRIKITS FOR CONCENTRIC DUALS

Broadest replacement coverage of concentric dual controls for TV, radio and auto sets is provided by CONCENTRIKIT—the unique control parts system. Wide selection of exact duplicate shafts and bushings eliminates cutting, filing and slotting. The CONCENTRIKITS are packaged groups of parts common to specific control types. Base-Elements are listed on pages 2, 3 and 5. Specifications for nearly 2000 Exact Duplicate Controls included in Howard W. Sams "REPLACEMENT GUIDE FOR TV AND AUTO RADIO CONTROLS."

### TONE SWITCHES

Special tone switch Base-Elements for use in panel section of auto radio controls. Packed with detent-type panel cover.

Stock No. Description

BS1	4 Position Tone Switch for Ford.
BS2	4 Position Tone Switch for Delco.
BS3	3 Position Tone Switch for Philco.
BS4	4 Position Tone Switch for Delco.
BS5	4 Position Tone Switch for Lincoln and Mercury.

### CONCENTRIKITS

Common parts for various types of concentric dual controls. Used with specific exact duplicate shafts and Base-Elements as specified in Howard W. Sams Replacement Control Guide, RGC.

Concentrikit	Panel Section	Rear Section	Bushing Size
K2*	C	C	3/8" x 3/8"
K3	W	C	3/8" x 3/8"
K4*	C	C	3/8" x 3/8"
K5*	C	C	3/8" x 1/4"
K6	C	C	3/8" x 3/8"
K7	C	C	3/8" x 3/8"
K8	C	C	None
K9	TS	C	None
K10	W	W	3/8" x 3/8"
K11	W	C	3/8" x 3/8"
K12	C	W	3/8" x 3/8"
K13	W	W	3/8" x 1/4"
K14	W	W	3/8" x 3/8"
K15	C	C	3/8" x 1/4"
K16**	C	C	3/8" x 3/8"
K17**	C	C	3/8" x 3/8"
K18**	C	C	3/8" x 1/4"

\* Spaced construction. All others close-coupled.

\*\* 76-5 Pull-push Switch Included.

C—Carbon. W—Wire. TS—Tone Switch.

# CONCENTRIKIT EXACT DUPLICATE SHAFT SPECIFICATIONS

## EXACT DUPLICATE SHAFTS

Stock numbers and corresponding lengths are listed on these pages. In general, the last three numbers of the stock number indicates shaft length from control mounting face (not end of bushing) to end of shaft. Of the last three numbers, the first indicates number of inches and the second and third number indicates the number of 32nds. For Stock No. P1-210, length is  $2\frac{1}{2}$ " or  $2\frac{5}{16}$ ". For inner shafts employed with K3 CONCENTRIKIT, subtract  $\frac{3}{16}$ " from dimension indicated by stock number.

There is an JRC Exact Duplicate Shaft available for nearly every concentric dual control. These Outer and Inner Shafts require no modification. Shaft lengths are held within close limits to original shaft lengths. Careful attention is given to end trims for fit to original knobs. The specifications on this page provide dimensions and use.

## TAPERS

New numerical taper system assigns specific identification for each Control. Listing below shows new taper number and old taper designation.

NEW TAPER DESIGNATION	OLD TAPER DESIGNATION	USE
1, 2	A	For potentiometer or rheostat where uniform resistance change is required.
3	C	Left-hand logarithmic taper for audio circuit control.
4, 5, 23, 45	D, Q, P	Right-hand semi-logarithmic taper for use in contrast and picture control circuits in television. Taper 4 is also used for stereo tone and balance control.
6	S	Bass and treble tone control for Philco.
7, 39, 41	S	Bass and treble tone control for Philco—open-circuited at mid-point.
8, 9, 20, 27, 38	S	Tapped right-hand taper for contrast and picture control circuits in television.
10	S	Tapped left-hand taper for contrast and picture control circuits in television. Also used for audio compensation.
11, 22, 24, 26, 30, 31, 37, 40, 44, 47	H, S	Tapped left-hand logarithmic taper for audio level control for automatic bass compensation.
12	S	Left-hand taper tapped at 50% of total resistance for audio compensation.
13	S	Left-hand taper tapped at 10% of total resistance for audio compensation, for transistor circuits.
14, 21, 28, 29	S	Right-hand logarithmic taper tapped for contrast and picture control circuits in television.
15, 16, 17, 18, 19, 35, 36, 43, 46	S	Left-hand logarithmic taper with double taps for tone and loudness compensation.
32	S	Fader control.
33	S	Left-hand taper with two taps for contrast and picture control circuits in television.
34, 38, 48	S	Right-hand taper with two taps for contrast and picture control circuits in television.
—	L	Left-hand taper for use in focus circuits in television.
—	R	Right-hand logarithmic taper for use in contrast and picture control circuits in television.
—	S	Tapped right-hand taper for contrast and picture control circuits in television.
—	U	For potentiometer or rheostat where uniform resistance change is required.

# CONCENTRIKIT DEALER STOCKS

## HANDSOME STOCK CABINET

The same spacious stock cabinet is provided with either the No. 90 or No. 92 stocks. Permits ready conversion of Basic Stock to Expanded Stock. Sturdy two-shelf metal cabinet measures 17 $\frac{1}{8}$ " wide, 11 $\frac{1}{8}$ " deep and 9" high. Provides twelve large "see-thru" drawers with new locking divider feature. Drawers measure 11" deep, 4" wide and 2" high—956 cubic inches of stock space! All needed dividers are included. Both drawer front and bottom labels provide full location and identification data.

## EXTENSIVE VARIATION OF CONTROL TYPES

CONCENTRIKIT Dealer Control Stocks provide an extensive variation of single and concentric dual control types. Included are a wide selection of control mountings, shafts, and power switches with both carbon (1/2 watt) and wire-wound (4 watts) front and rear sections. Control mountings include  $\frac{3}{8}$ ",  $\frac{7}{16}$ " and  $\frac{1}{2}$ " diameter bushings, tab mounting plates and printed circuit brackets. Shaft styles include  $\frac{1}{4}$ " and  $\frac{3}{16}$ " diameter universal shafts, screw-driver slotted and insulated shafts, rear adjustment feature and a large selection of exact duplicate shafts which require no cutting or modification.

Rotary and pull-push power switches attach to either single or concentric dual styles. Concentric dual controls include carbon front and rear sections, wirewound front and rear sections and wirewound front sections with carbon rear sections. Carbon units are equipped with printed circuit terminals for universal use. Broad selection of resistance values and tapers. Replacement data, pricing information and full instructions included.

## CONCENTRIKIT DEALER CONTROL STOCKS

Most widely used control replacement system, the new CONCENTRIKIT stocks employ the unique adaptability of this true control parts system to provide top coverage of needed replacement controls. Parts included have been carefully selected for broadest combinations for TV, radio, auto sets and high-fidelity equipment. The exclusive features of CONCENTRIKIT afford a nearly endless variety of single and concentric dual controls.

Two specially planned dealer stocks are available. No. 90 is a Basic Stock of Concentrikit parts. No. 92 is an Expanded Stock providing over three times the replacement coverage. Both stocks are housed in the same large metal cabinet with twelve "see-thru" drawers. Special labelling supplies quick location and identification of parts. No. 91 Conversion Stock changes the Basic Stock into the Expanded Stock.

## CONTENTS OF NEW DEALER CONCENTRIKIT STOCKS

# INDUSTRIAL Q CONTROLS

IRC ½ watt controls for industrial and commercial applications provide a wide selection of resistance values, tapers and shaft styles. Types PQ, RQ and RQL may be combined with Type M Multisections to provide broad variety of multiple-section controls.

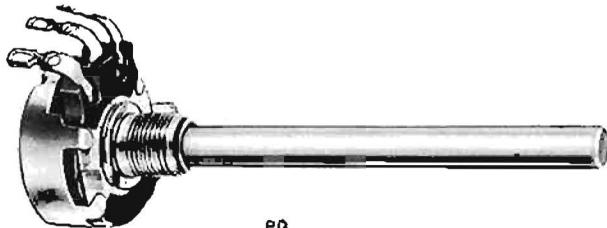

## TYPE PQ

Control has full round  $\frac{3}{4}$ " shaft, extending approximately 3" from mounting face, and with  $\frac{3}{8}$ " long bushing. ½ watt power rating, 500 volts maximum. It is available in 33 stock values.

## TYPE RQ

Control has a very short screwdriver slot shaft of  $\frac{1}{4}$ " diameter and approximately  $\frac{1}{2}$ " long from mounting face, with  $\frac{3}{8}$ " long bushing. ½ watt power rating. Supplied in 33 stock values.

Electrical rotation of these controls is the same with

PQ

M

RQ with Multisections

CONSUMER AND DISTRIBUTOR PRODUCTS DIVISION • PHILADELPHIA, PENNSYLVANIA

or without power switches (See Type Q Accessories, pages 6 and 7). Special platings of metal parts provide excellent appearance. Resistance tolerance of all units is  $\pm 10\%$ .

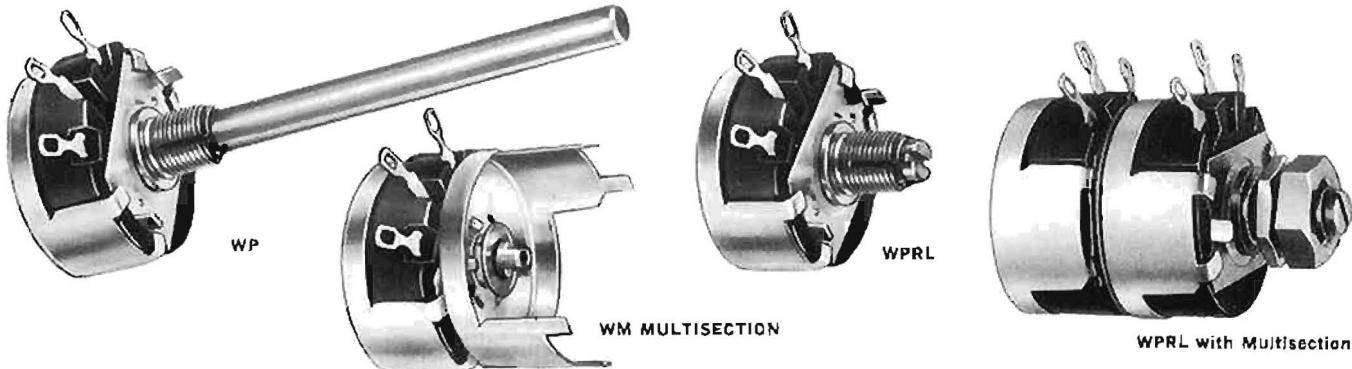

## TYPE RQL

A 10% tolerance control with locking type bushing. Screwdriver slot shaft is  $\frac{1}{4}$ " diameter and approximately  $\frac{1}{2}$ " long from mounting face, with a  $\frac{3}{8}$ " split type bushing, and locking nut. Supplied in 26 stock values. ½ watt power rating.

## TYPE M MULTISECTIONS

IRC Type M Multisections are rear control sections which add to Types PQ, RQ, RQL or any Type Q control to provide multiple-section tandem controls. Supplied in 25 stock numbers as listed on opposite page. Resistance tolerance is  $\pm 10\%$ . See pages and for power switches and other accessories.

# INDUSTRIAL 4W CONTROLS

## TYPE 4/W INDUSTRIAL CONTROLS

IRC Type 4W Controls for industry provide 4 watt (linear) rating in conventional 2 watt size. Available in wide assortment of resistance values. Types WP and WPRL may be combined with Type WM Multisections to provide broad selection of tandem dual controls.

Special platings of metal parts provide outstanding appearance. Resistance tolerance of all units is  $\pm 10\%$ .

### TYPE WP

A wirewound industrial control with  $\frac{3}{8}$ -32 x  $\frac{3}{8}$ " bushing and a full round shaft of  $\frac{1}{4}$ " diameter, approximately 3" long from mounting face. For 2, 3 and 4 watt requirements — 10% tolerance; linear taper; in 36 stock values as listed on the opposite page.

### TYPE WM MULTISECTIONS

These 4 watt Multisections are rear control sections which add to Types WP and WPRL to supply a wide selection of tandem dual controls. Available in 13 factory-assembled stock numbers. WM Multisections do not operate power switches.

### TYPE WPRL

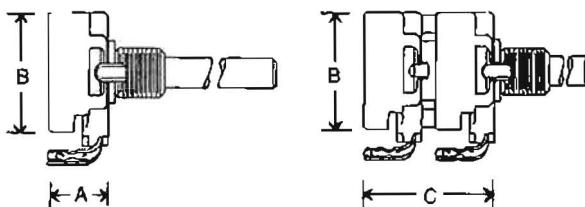

A wirewound industrial control with a short, screwdriver slot shaft of  $\frac{1}{4}$ " diameter and approximately  $\frac{1}{2}$ " long from mounting face, with  $\frac{3}{8}$ " locking type bushing, and locking nut. For 2, 3 and 4 watt requirements — 10% tolerance; linear taper; 36 stock values.

Fast, local delivery from Distributors' stock is now available for IRC-CTS military controls. A total of 255 variable resistors is included in this new, local service. The 6 styles illustrated cover the latest MIL-R-94B composition and MIL-R-19A wire wound specifications.

## IRC-CTS WIRE WOUND VARIABLE RESISTORS TO MIL-R-19A

### STYLE RA20 2 WATT WIRE WOUND

Type 252, style RA20, 1 $\frac{1}{16}$ " diameter wirewound variable resistor.

STYLE RA20

- 2 watt rating
- Compact size
- Meets MIL-R-19
- 15 resistance values
- Insulated housing
- Built-in high torque

Choice of 2 shaft styles, plain or locking bushings.

### STYLE RA30 4 WATT WIRE WOUND

Type 25, style RA30, 1 $\frac{1}{16}$ " diameter wirewound variable resistor.

STYLE RA30

- 4 watt rating
- Reliable CTS wirewound element
- Meets all MIL-R-19 requirements
- 15 resistance values
- Built-in high torque

Choice of 2 shaft styles, plain or locking bushings.

## IRC-CTS COMPOSITION VARIABLE RESISTORS TO MIL-R-94B

### STYLE RV2 1 WATT COMPOSITION

Type 90, style RV2,  $\frac{1}{3}$ " diameter composition variable resistor.

STYLE RV2

- 1 watt rating
- Operational up to  $150^{\circ}\text{C}$
- 14 resistance values
- Meets characteristics X and Y
- Designed for high temperature and humidity military applications

Choice of 2 shaft styles, plain or locking bushings.

### STYLE RV4 3 WATT COMPOSITION

Type 96/320/321, style RV4,  $\frac{1}{3}$ " diameter composition variable resistor

STYLE RV4

- 3 watt rating
- Completely enclosed construction
- Excellent heat sink qualities
- 15 resistance values
- Long life, no noise
- Reliable carbon-ceramic element

Choice of 2 shaft styles, plain or locking bushings.

### STYLE RV5 $\frac{1}{2}$ WATT MINIATURE COMPOSITION

Type 65, style RV5,  $\frac{3}{4}$ " diameter composition register.

STYLE RV5

Choice of 2 shaft styles, plain or locking bushings.

### STYLE RV6 $\frac{1}{2}$ WATT MINIATURE COMPOSITION

Type 300, style RV6,  $\frac{1}{4}$ " diameter composition resistor.

STYLE RV6

- $\frac{3}{4}$  watt rating
- Miniature size
- Excellent stability
- 14 resistance values
- Reliable carbon-ceramic element
- High resolution

Choice of 2 shaft styles, plain or locking bushings.

# INDUSTRIAL VARIABLE RESISTORS

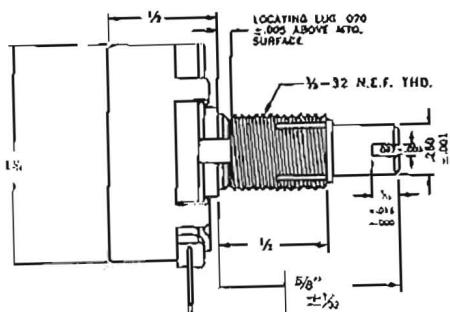

**IRC-CTS TYPE 321/RV4 THREE-WATT INDUSTRIAL CONTROL (MILITARY GRADE)**

## FEATURES

- COMPLETELY ENCLOSED CONSTRUCTION
- CARBON-CERAMIC ELEMENT
- EXCELLENT HEAT SINK QUALITIES
- MEETS MIL-R-94B, STYLE RV4
- HIGH INSULATION RESISTANCE OF CERAMIC
- LONG LIFE, LOW NOISE
- LARGE SAFETY FACTOR

SIDE VIEW OF TYPE 321S CONTROL

SIDE VIEW OF TYPE 321LT CONTROL  
WITH LOCKING BUSHING

## ELECTRICAL AND MECHANICAL SPECIFICATIONS

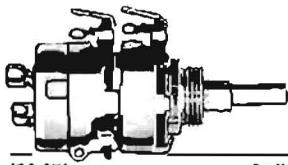

- **RESISTANCE RANGE**  
250 ohms through 2.5 megohms (linear taper).
- **TOLERANCE**  
± 10% standard, ± 20% standard for values 1 megohm and above.
- **TAPERS . . .** Linear
- **WATTAGE AND TEMPERATURE RATING**  
3 watts at 70°C or 2 watts at 95°C derated to no load at 150°C.  
500 volts DC maximum safe operating voltage across resistance element.
- **MOUNTING BUSHING DIMENSIONS**  
Diameter:  $\frac{3}{8}$ " — 32 N.E.F. thread  
Length: Non-Lock —  $\frac{3}{8}$ " standard  
Locking —  $\frac{1}{2}$ " standard
- **ANGLE OF ROTATION . . .**  $315^\circ \pm 5^\circ$
- **SHAFT DIAMETER . . .**  $.250" \pm .001"$
- **SHAFT LENGTH**  
As shown under Ordering Information below.
- **SHAFT TRIM**  
Screwdriver slot (Type LT) standard.
- **LOCATING LUGS**  
Standard position is left side (terminals down) as illustrated.
- **TAPS . . .** None.

# AUTO RADIO CONTROLS

**EXACT DUPLICATE CONTROLS** For 298 different makes and models. IRC-CTS's line of exact duplicate controls includes 137 individual types. Faster servicing results from these top-quality controls because of IRC-CTS's strict adherence to manufacturer's specifications.

# SPECIAL PURPOSE CONTROLS

## 2 WATT, 3/4" DIAMETER WIREWOUND CONTROLS

IRC buzz-bias controls are 2 watt preset type wirewound resistors. They are designed for hum-balancing, sensitivity, bias-adjust, AGC, holding, locking, and other radio and TV applications. All units are  $\pm 20\%$  tolerance, linear taper, and have contact arm grounded to housing. Manufactured by CTS Corporation.

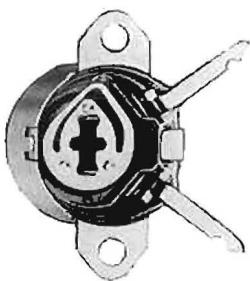

### TYPE 110—TAB-MOUNT UNIT

IRC STOCK NO.	RESISTANCE
110-1.5	1.5 $\Omega$
110-5	5 $\Omega$
110-15	15 $\Omega$
110-60	60 $\Omega$
110-100	100 $\Omega$
110-300	300 $\Omega$
110-600	600 $\Omega$
110-1000	1000 $\Omega$
110-3000	3000 $\Omega$
110-3000-350	3000 Stops at 350 $\Omega$

TYPES 110 & 110D

### TYPE 112—FLANGE MOUNT UNITS

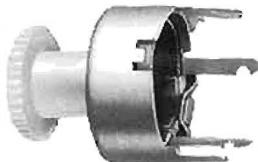

TYPE 112

IRC STOCK NO.	RESISTANCE
112-50	50 $\Omega$
112-100	100 $\Omega$
112-150	150 $\Omega$
112-200	200 $\Omega$
112-300	300 $\Omega$
112-500	500 $\Omega$
112-500-100	5000 $\Omega$ Stops at 100 $\Omega$
112-600	600 $\Omega$
112-650	650 $\Omega$
112-800	800 $\Omega$
112-800-50	8500 $\Omega$ Stops at 50 $\Omega$
112-1000	1000 $\Omega$
112-1000-100	10000 $\Omega$ Stops at 100 $\Omega$
112-1500	1500 $\Omega$
112-2000	2000 $\Omega$
112-2000-100	20000 $\Omega$ Stops at 1000 $\Omega$
112-2500-700	25000 $\Omega$ Stops at 700 $\Omega$
112-3000	3000 $\Omega$
112-4000	4000 $\Omega$
112-4000-350	40000 $\Omega$ Stops at 350 $\Omega$
112-4000-1000	40000 $\Omega$ Stops at 1000 $\Omega$
112-5000	5000 $\Omega$
112-10K	10K $\Omega$

### TYPE 110D—TAB-MOUNT SPECIAL TEMPERATURE COMPENSATED UNITS

IRC STOCK NO.	RESISTANCE
110D175-60	175 $\Omega$ Stops at 60 $\Omega$ Replaces Delco #7275554
110D260-90	260 $\Omega$ Stops at 90 $\Omega$ Replaces Delco #7275474

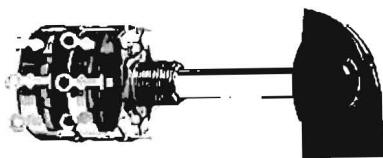

### TYPE 110C—TAB-MOUNT TV COLOR CONVERGENCE CONTROLS WITH INTEGRAL NYLON KNOBS

IRC STOCK NO.	RESISTANCE
110C-10	10 $\Omega$
110C-30	30 $\Omega$
110C-60	60 $\Omega$
110C-120	120 $\Omega$
110C-150	150 $\Omega$

TYPE 110C

## L & T ATTENUATOR PADS

IRC-CTS L and T pads provide constant impedance for use in sound systems and for speaker controls. Both types handle up to 15 watts audio power (5 watts DC). L pads provide a constant input impedance and T pads provide constant input and output impedances.

### ELECTRICAL SPECIFICATIONS:

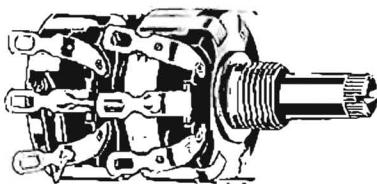

- Continuous D.C. Rating: 5 watts
- Peak Audio Rating : 15 watts
- Dielectric Strength : 1000 V.A.C. RMS to Ground
- Attenuation Range : 4, 8 and 16  $\Omega$  IMPEDANCES: 0 to 30 db
- : 5000  $\Omega$  IMPEDANCE: 0 to 40 db
- Insertion Loss : Negligible (less than .5 db)
- Input Impedance : Constant within  $\pm 30\%$   $\pm 20\%$

### MECHANICAL SPECIFICATIONS:

- Size : 1 1/8" diameter
- Shaft Dimensions
- Diameter : .250"
- Length : 2" from mounting surface
- Bushing : 3/8"-32 x 9/16" long bushing
- Angle of Rotation : 300°  $\pm$  5°

IRC Stock No.	IMPEDANCE
L PADS	
LP4A	4 $\Omega$
LP8A	8 $\Omega$
LP15A	15 $\Omega$
LP500A	500 $\Omega$
T PADS	
TP4A	4 $\Omega$
TP8A	8 $\Omega$
TP15A	15 $\Omega$
TP500A	500 $\Omega$

# SPECIAL PURPOSE CONTROLS

**TV ATTENUATORS** for on-the-spot adjustment of signal input to TV set. In most cases it corrects or reduces adjacent channel interference, background picture on weaker stations, poor definition, picture and sound break-over. Type QJ-3 is widely used in service work to duplicate fringe area signals when near strong local station.

**LOUDNESS CONTROLS** that are continuously compensated to boost lows and highs as volume is decreased. Maintains depth and brilliance even at whisper level. The LC-2 can easily be wired into most audio circuits. Typical installation instructions included. Uses types 76-1, 76-2 or 76-4 switches.

## TV HEIGHT CONTROLS

### AVOID CALL-BACK INCONVENIENCES

### USES

This control is supplied for reliable replacement of TV Height Controls and other controls in B+CIRCUITS — such as AGC,

NOISE GATE,

FOCUS,

FRINGE LOCK and

SYNC controls — which have become unsatisfactory because of element etching due to voltages present in the particular circuitry.

### FEATURES

- Premium quality control (originally designed for rugged service in military gear)
- 1 watt rating, 750 V. max. between outer terminals
- Small size — 15/16" diameter — same as most original controls
- Nylon shaft — slotted and knurled — easily shortened where required
- Tab mounting
- Rear adjustment

### TYPE HLC TV HEIGHT CONTROLS

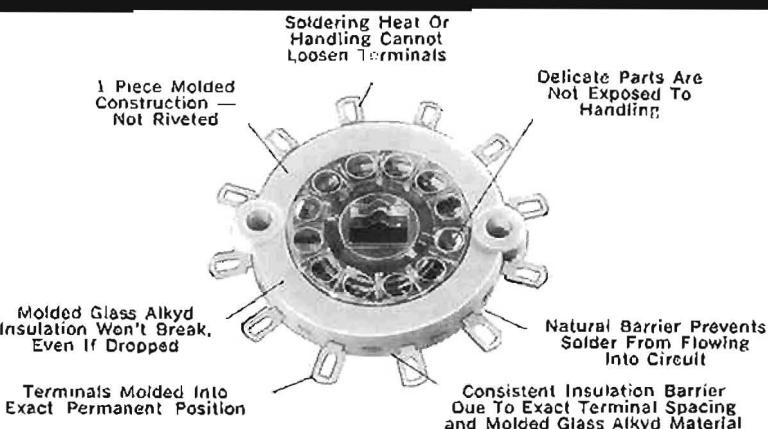

IRC Stock No.	Resistance Value
HLC-1	2.0 Meg. $\pm$ 30%
HLC-2	2.5 Meg. $\pm$ 30%
HLC-3	3.0 Meg. $\pm$ 30%
HLC-4	4.0 Meg. $\pm$ 30%
HLC-5	5.0 Meg. $\pm$ 30%
HLC-6	7.5 Meg. $\pm$ 30%

# ROTARY SELECTOR SWITCHES

Switch Wafers Assembled  
Without Spacers

## SELECTOR SWITCH UNIQUE 1-PIECE MOLDED WAFER PROVIDES HIGH RELIABILITY

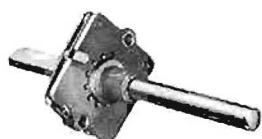

The new IRC-CTS design goes right to the heart of selector switch reliability . . . the wafer. Automated manufacture provides unprecedented uniformity. One-piece *molded* construction of the wafer virtually eliminates drift. In each production run, all switches are identical, terminal placement is exact and permanent. Machine exactness replaces human error and variation, eliminating wide tolerances and assuring high reliability.

- Compact  $1\frac{1}{16}$ " size design allows more circuitry per unit of depth behind panel.
- Rivet-free construction permits closer stacking.
- Superior insulation due to repetitive exactness in terminal spacing, and molded glass alkyd material.
- 1000% more silver than used by most commercial switches—evenly applied at point of contact.
- Rotor contacts are double-wiping and self-cleaning.
- Stator contacts are integral with terminals.
- Molded stator will not break or crush during ordinary handling, or if it is dropped.

## GENERAL SPECIFICATIONS

INSULATION:	COMMERCIAL TYPE 212 SERIES Stator—Glass Alkyd Resin Rotor—Polycarbonate (Lexan)	INDUSTRIAL-MILITARY TYPE M-212 SERIES Stator—Type MAI-30 per MIL-M-21699 Rotor—IL grade glass-filled nylon
STATOR CONTACTS AND TERMINAL LUG MATERIAL	Laminated silver movable contacts. Terminals and stator are brass, silver plated.	Military grade laminated silver. Silver plated movable contacts. Terminals and stator are brass, silver plated.
OPERATING TEMPERATURE:	85° C.	125° C.
DETENTS:	Index plate 30° between positions with one fixed and one adjustable stop.	Index plate 30° between positions with one fixed and one adjustable stop.
FINISH:	50-hour salt spray.	50-hour salt spray.
MOUNTING DETAILS:	Bushing— $\frac{3}{8}$ "-32 thread, $\frac{3}{8}$ " long. Shaft— $\frac{1}{4}$ " diameter round shaft, $1\frac{1}{8}$ " beyond end of bushing. Hardware furnished.	Bushing— $\frac{3}{8}$ "-32 thread, $\frac{3}{8}$ " long. Shaft— $\frac{1}{4}$ " diameter round shaft, $1\frac{1}{8}$ " beyond end of bushing. Hardware furnished.
MILITARY APPLICATIONS	Both types 212 and M-212 meet requirements of MIL-S-3786A, type SRO-3.	

### EXCLUSIVE MILITARY GRADE CTS-IRC STARWHEEL SHAFT AND 30° DETENT ASSEMBLY

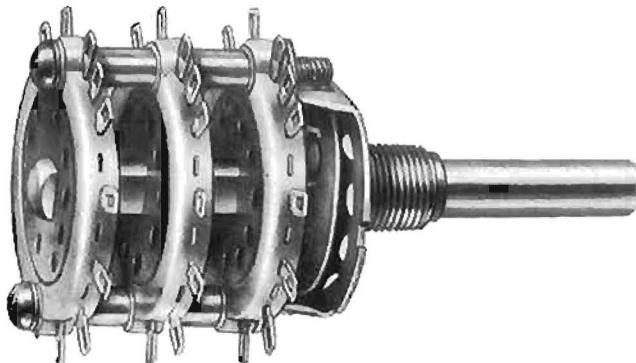

T-180

T-181

T-182

A balanced lever arm and star wheel detent assembly free from end and side thrust is available for precision military and instrumentation applications. Star wheel detent provides extremely long life and minimum turning torque variation. Double lever arm construction controls torque in both directions of rotation with practically no change in torque during 100,000 cycles of operation through 12 switch positions.

# ROTARY SELECTOR SWITCHES

## 212 Wafer Assembly

The wafer assembly of the IRC-CTS selector switch can be separated into three basic elements, the rotor insulator, the rotor contacts and the stator. The stator consists of the stator insulator, terminal lugs, contacts, contact ring, which is made as a single unit.

### Stator Insulator

The stator insulator is a circular molding which encloses the mid portion of each contact and serves as a container for the rotor. The stator insulator also serves as a natural solder and flux barrier, thus protecting the contact areas.

### Contact Resistance

Circuit resistance ranges from .003 to .004 ohms on standard switches when measured from one terminal to an adjacent terminal. When measured terminals are not adjacent, up to 180° apart, the resistance will measure higher due to the extra metal in the stator circuits. It is to be noted

### Contact Life:

Standard sterling silver laminated rotor contacts and brass silver plated stator provide reliable life for a minimum of

### Detent Rotational Life:

The standard 212 detent assembly (T79, T80, T81 & T82) has a rated life of 25,000 cycles through 12 positions and return.

## LONGER LIFE CONTACTS

- After 1,100,000 index operations, life tests reveal virtually no change in rotor contact resistance.
- 1,000% more silver than used by most commercial switches has been evenly applied at actual point of contact by exclusive process. (See Sketch.)
- Rotor contacts are double-wiping and self-cleaning.
- Stator contacts are integral with terminals.

## ELECTRICAL RATING

### Voltage and Current Ratings:

1 amp at 28 volts DC  
1½ amps at 115 volts AC

### High Pot Test:

Between adjacent 30° terminals or terminals to ground: 1,750 volts AC RMS for one minute. Between adjacent 15° terminals: 750 volts AC RMS for one minute.

### The Stator

The Stator is the heart of the IRC-CTS selector switch and determines the circuitry of the switch in conjunction with the location of the selected rotor contacts. The stator is actually a circuit pattern cut out of metal which forms the terminal lugs, center contact ring and the stator contact.

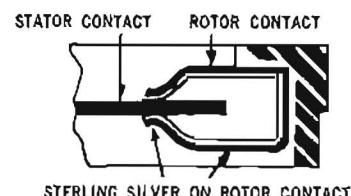

### Rotor

The rotor of the IRC-CTS selector switch holds the rotor contacts in place and carries the contacts from one position to another, providing controlled float which prevents open circuiting during severe shock or vibration.

that the circuit resistance check measures all the metal in the circuit. Thus actual resistance at the point of contact is considerably less than the measured resistance. In CTS assemblies, contact resistance is unusually stable throughout the switch life.

50,000 cycles through 12 positions and return without appreciable increase in contact resistance. (See detent life.)

The star wheel detent mechanism (T180, T181, & T182) has a rated life of 100,000 cycles through 12 positions and return.

# ROTARY SELECTOR SWITCH ACCESSORIES

## IRC-CTS ATTACHABLE POWER SWITCHES

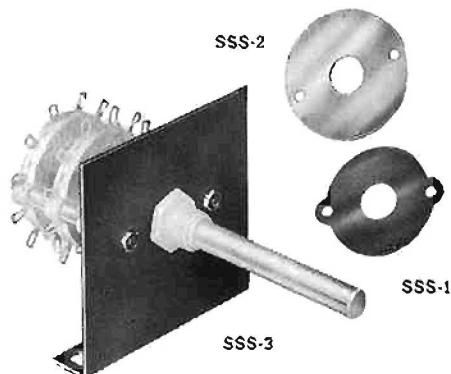

A selection of reliable AC power switches is available for use with selector switches, giving an original source for both the selector switch and attached switches. These power switches can be mounted on the rear frame of the selector switch or between wafers by means of a specially designed bracket.

STOCK NO.	DESCRIPTION	VOLTAGE	CURRENT
GC-21	SPST	125	3 Amps
VF-21	SPDT	125	3 Amps
WF-21	DPST	125	3 Amps

## SEALED SWITCH KITS

STOCK NO.	DESCRIPTION
SSK-1	Enclosed detent construction seals both the wafer sections and the detent mechanism of the switch against dust, dirt, and moisture.
DSWK-1	Open detent construction protects and seals the wafer sections of the selector switch against dust and dirt.

## SHIELDS AND MOUNTING BRACKETS

Shielding of switch sections from each other may be accomplished with these Switch Shields.

STOCK NO.	DESCRIPTION
SSS-1	Standard Shields
SSS-2	Brass, Silver Plated Shields
SSS-3	Combination Shields and Mounting Brackets

## IRC-CTS ROTARY SELECTOR SWITCH ENGINEERING LAB STOCK

The ELS-8 Rotary Selector Switch Lab Stock affords you the versatility of a combination for every application. The Lab Stock consists of:

75 Wafer Sections 30 Detent Assemblies

Three Power Switches

2 Switch Seal Kits

15 Shields

Includes Metal Cabinet and Labels

# KODAK SOUND RECORDING TAPES

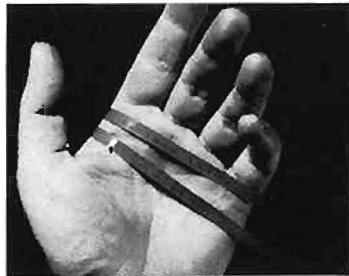

Whatever your recording needs there is a KODAK Tape to do the job. For a general-purpose tape with low-print characteristics, choose Type 31A. Type 34A is a high-output tape which can also be used as a low-noise tape if record levels can be adjusted. For longer-playing applications try Types 21A and 21P (extra play) or Type 11P (double play). And now, Type 12P for triple-play. You'll find KODAK Sound Recording Tapes are available in a complete range of sizes and windings for amateur and professional use.

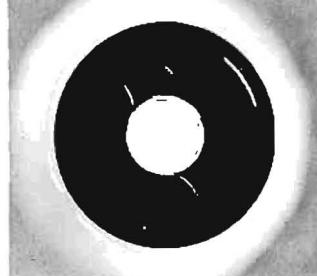

- **KODAK MEANS QUALITY.** The only professional quality tapes available at popular tape prices. Two great types... Professional Low Print-Through and Professional High Output. Both are lifetime coded to identify the brand and provide convenient indexing.
- **CONSISTENT UNIFORMITY** due to Eastman Kodak's exclusive emulsion process, consistent high quality is maintained from batch to batch and from reel to reel.
- **NO STRETCH.** New DUROL® base material is the Eastman Kodak's cellulose triacetate that is smooth, tough and durable. Breaks are clean... splices are made quickly, easily with minimum program loss.
- **NEW BINDER MATERIAL.** Coatings of "R-type" binder give a smoother, tougher recording surface that reduces tape noise and distortion. It is extremely abrasion resistant, preventing oxide build-up at the recording head.
- **THREAD EASY REEL** loads fast and easy. Rugged one-piece construction has indexing scale, built-in splicing jig and handy writing surface for tilting or identification. Supplied at no extra charge with all 5 and 7 inch rolls of KODAK Tape.
- **DURABLE LIBRARY CONTAINER.** Tough one-piece construction means package won't come apart even with heavy usage.

DESCRIPTION		CAT. NO.	SIZE	REEL*
STANDARD PLAY	1½ MIL PLASTIC—Low Print-Through and other excellent performance characteristics. Ideal for general-purpose and master recordings. Type 31A base is Durol—a high strength cellulose triacetate plastic-type support material.	31A1 31A6 31A12 31A25MH 31A25HF 31A25PHB 31A25PH 31A50PHB	1/4" x 150' 1/4" x 625' 1/4" x 1250' 1/4" x 2500' 1/4" x 2500' 1/4" x 2500' 1/4" x 2500' 1/4" x 5000'	3" plastic reel in mailing box 5" plastic "Thread Easy" 7" plastic "Thread Easy" Metal NAB hub 10½" metal NAB hub and flange Plastic NAB hub (unboxed) Plastic NAB hub Plastic NAB hub (unboxed)
HIGH OUTPUT	1½ MIL PLASTIC—High Output with remarkable low print-through. Professional performance Specifications. Type 34A base is Durol high strength triacetate designed to minimize distortion under high tension.	34A12 34A25MH 34A25HF 34A25PHB 34A25PH 34A50PHB	1/4" x 1250' 1/4" x 2500' 1/4" x 2500' 1/4" x 2500' 1/4" x 2500' 1/4" x 5000'	7" plastic "Thread Easy" Metal NAB hub 10½" metal NAB hub and flange Plastic NAB hub (unboxed) Plastic NAB hub Plastic NAB hub (unboxed)
EXTRA PLAY	1 MIL PLASTIC—Longer play with Durol strength and good low print-through without sacrifice of excellent general-purpose features.	21A9 21A18	1/4" x 900' 1/4" x 1800'	5" plastic "Thread Easy" 7" plastic "Thread Easy"
EXTRA PLAY	1 MIL POLYESTER—Polyester base for strength—new "R-Type" binder for outstanding sound recordings.	21P9 21P18	1/4" x 900' 1/4" x 1800'	5" plastic "Thread Easy" 7" plastic "Thread Easy"
DOUBLE PLAY	½ MIL POLYESTER—Extra thin and treated for extra strength. Longer length for more playing time.	11P4 11P12 11P25	1/4" x 400' 1/4" x 1250' 1/4" x 2500'	3" plastic reel in mailing box 5" plastic "Thread Easy" 7" plastic "Thread Easy"
TRIPLE PLAY	½ MIL POLYESTER—Triple play with superior print-through ratio. No sacrifice of general purpose performance.	12P6 12P18 12P36	1/4" x 600' 1/4" x 1800' 1/4" x 3600'	3½" plastic reel in mailing box 5" plastic "Thread Easy" 7" plastic "Thread Easy"

\* Unique Library Box only available with 5" & 7" size reels.

EASTMAN KODAK means quality. The only professional quality tapes available at popular tape prices. Two great types... Professional Low Print-Through and Professional High Output. Both are lifetime coded to identify the brand and provide convenient indexing.

Thread Easy Reel loads fast and easy. Rugged one-piece construction has indexing scale, built-in splicing jig and handy writing surface for tilting or identification.

# VINYL ELECTRICAL TAPE

- Saves space in confined areas . . . ends "twice-around" wraps with bulky tapes.
- Provides a tight insulated plastic seal . . . resistant to abrasion, water, acids, alkalies, corrosion and aging.
- Gives a neater wrap . . . adheres readily to irregular surfaces and contours.
- Makes an excellent wrap for insulating tools.

**TAPE-AND-TEAR DISPENSER.** For one-hand taping IRC Vinyl Electrical Tape comes in a sturdy tape-and-tear dispenser that keeps tape clean and prevents stretching. Cutting blade is shielded. Dispenser is loaded with 66 feet of  $\frac{3}{4}$ " tape. Also Available in cellophane wrapped rolls:

STOCK NUMBER	SIZE	PACKAGING
VT 104 "All-Weather"	$\frac{3}{4}$ " x 66'	Dispenser
VT 103	$\frac{3}{4}$ " x 66'	Dispenser
VT 103	$\frac{3}{4}$ " x 20'	Cellophane Wrapped
VT 103	$\frac{3}{8}$ " x 20'	Cellophane Wrapped
VT 103	$\frac{3}{8}$ " x 36 YDS.	Cellophane Wrapped

## PROPERTIES OF IRC VINYL ELECTRICAL TAPE

	GENERAL PURPOSE TYPE 103	ALL-WEATHER TYPE 104
<b>PHYSICAL PROPERTIES</b>		
Thickness	.007"	.0085"
Tensile Strength	19 lb./in. of width	22 lb./in. of width
Elongation at Break	150%	200%
Adhesion to Steel	32 oz./in. of width	20 oz./in. of width
Low Temperature (4 hrs. @ 0°F)		Unrolling & Application Satisfactory
<b>ELECTRICAL PROPERTIES</b>		
Dielectric Strength	10,000v/mil (min.)	10,000v/mil (min.)
Power Factor @ 60 Cycles	.07	.07
Power Factor @ 10 <sup>4</sup> Cycles	.03	.03
Dielectric Constant at 60 Cycles	3.2	3.2
Dielectric Constant at 10 <sup>4</sup> Cycles	2.3	2.3
Insulation Resistance	Over 10 <sup>6</sup> Megohms	Over 10 <sup>6</sup> Megohms
Electrolytic Corrosion Factor	1.0	1.0
Resistance to Penetration at Elevated Temperatures	90°C (Avg.)	90°C (Avg.)
<b>CHEMICAL PROPERTIES</b>		
Sunlight	Not Affected	Not Affected
Corrosive Effect on Electrical Conductors	None	None
Resistance to Water	Excellent	Excellent
Resistance to Acids	Excellent	Excellent
Resistance to Alkalies	Excellent	Excellent
Resistance to Oils	Excellent	Excellent
Resistance to Aging at Room Temperature	Excellent	Excellent

Both Types 103 and 104 Meet MIL-I-7798A

SAVES TIME. Quicker than friction and rubber tape combinations. Takes only one operation instead of two. Adheres readily to irregular surfaces and contours. Makes a neater job.

# CONTROL CLEANER

IRC Stock No. CC-1

**STOPS NOISY  
OPERATION OF  
CONTROLS & SWITCHES**

## IRC ELECTRONIC CONTROL CLEANER CLEANS, LUBRICATES & PROTECTS:

- Volume Controls
- Tuners
- Switches
- Relays
- Contacts
- Circuit Breakers
- Other Sensitive Components

## FEATURES:

- Long-lasting protection against damaging corrosion and oxidation
- Removes dirt and clogging gum
- Deposits a non-drying film that lubricates contact surfaces
- Non-toxic—does not contain carbon tetrachloride
- Non-flammable
- Non-conductive—does not cause shorts
- Free 5" plastic extender included with each can for pin-point applications
- Works up-side-down for hard-to-reach places

## APPLICATIONS INCLUDE:

- Radio & TV
- Switchboards
- Vending Machines
- Timers
- Computers
- And wherever electrical contacts are found

**ECONOMICAL — 7 FULL OUNCES SELLING AT THE  
USUAL PRICE OF 6 OUNCE CANS**

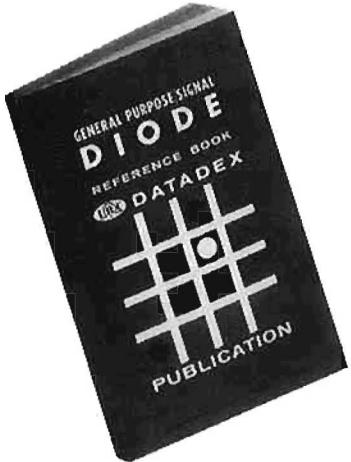

**USE IRC CONTROL CLEANER FOR BRAND NAME ASSURANCE**

# DIODE & TRANSISTOR REFERENCE BOOKS

## DATADEX DIODE REFERENCE BOOK

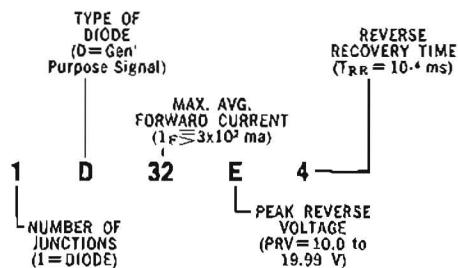

IRC No DS-1

- Over 260 pages of useful diode information
- Interchangeability guide for more than 3000 types
- Diode theory
- Circuits & circuit descriptions
- Diode indexing by parameters
- Price information
- Diode testing and handling procedures
- Actual size case outlines and dimensions

This first edition contains information on:  
General Purpose Signal Diodes  
Microwave Mixer and Detector Diodes  
Photo-Sensitive Diodes  
Tunnel and Back Diodes  
Varactor Diodes  
Variable Capacity Diodes  
Unijunction Transistors

**DATADEX SYSTEM OF DIODE IDENTIFICATION BY PARAMETERS** The Datadex identification system helps the user locate a semiconductor device for a particular application without having to search a myriad of manufacturers' specification sheets to find the right type number. Datadex includes a complete index of identification numbers which describe diode characteristics such as average forward current, peak operating voltage, and recovery time. An interchangeability guide lists corresponding JEDEC type numbers.

EXAMPLE: Datadex number 1D32E4

## DATADEX TRANSISTOR REFERENCE BOOK

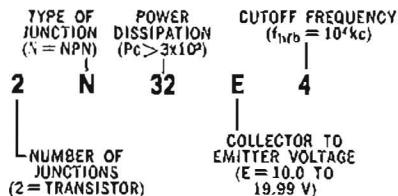

IRC No. DT-2

- 300 pages of useful transistor information
- Interchangeability guide for more than 5000 types — including foreign makes
- Transistor theory
- Circuits & circuit descriptions
- Transistor indexing by parameters
- Price information
- Transistor testing and handling procedures

The second edition contains theory, circuit, and data sections on field-effect transistors.

**DATADEX SYSTEM OF TRANSISTOR IDENTIFICATION BY PARAMETERS** The Datadex identification system helps the user locate a semiconductor device for a particular application without having to search a myriad of manufacturers' specification sheets to find the right type number. Datadex includes a complete index of identification numbers which describe transistor characteristics by indicating the type and number of junctions, the maximum power, voltage, and frequency cutoff ratings. An interchangeability guide lists corresponding JEDEC type numbers.

EXAMPLE: Datadex number 2N32E4
